
Florida Municipal Pension Trust Fund – DB 70% Equity Allocation
Executive Summary
As of December 31, 2024

70% Equity Allocation

- The FOMC reduced the Federal Funds target rate by 50 bps to 4.25% - 4.75% in the fourth quarter, as expected. However the committee's economic projections signaled a hawkish bias towards only two rate cuts in 2025. Equity markets were lower in December as markets reacted to the hawkish Fed projections. Small cap stocks lagged as the risk from higher than expected rates offset the prior month's optimism over potential benefits from election results. The US Treasury curve steepened in December with longer-term bond rates rising as markets came around to the view that rates are likely to remain well above pre-pandemic levels in 2025. Real estate returns were positive in the 4th quarter for the first time since 3rd quarter of 2022. All sectors but Offices produced positive returns in the quarter. The 70% Equity Allocation trailed the Target Index in the fourth quarter, falling 2.0% versus down 1.5% for the index.
- This allocation has earned an 9.7% return over the past year, slightly behind the performance of the Target Index (up 10.6%).
- Over the past 10 years, this allocation is up 7.5% on average annually. While this performance is modestly behind the index, it ranks in the top 27th percentile of the peer group, with the risk controlled nature of many of the underlying strategies providing downside protection should the markets continue to moderate or decline.

FMIvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund continued to perform in line with the Bloomberg US Aggregate A+ Index in the fourth quarter (down both down 3.1%). The Fund has continued to benefit from its exposure to the ABS sector and security selection within the MBS sector. The past 5 years, the Fund has achieved nearly 30 basis points of excess return on average annually relative to the benchmark.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMIvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund provided downside protection in the fourth quarter relative to the Bloomberg Multiverse, down 2.7% vs. down 5.0%. The fund benefited from continuing to hold an overweight to ABS and CMBS, and the lower relative quality of its holdings. Strong security selection within the Industrials, Financials and agency MBS sectors continues to move the Fund forward. The fund has outpaced the benchmark by over 580 basis points over the past year.
- In the 10 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 1.4% on average annually, ahead of the benchmark (up 0.4%).

FMIvT Diversified Large Cap Equity Portfolio

- The fund is allocated 60% to the SSgA S&P 500 Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity marketplace. The SSgA S&P 500 Fund replaced Intech in the fourth quarter 2023.
- U.S. equities continued to produce strong results in the fourth quarter with solid earnings and momentum continuing to drive US large cap returns, but volatility has increased as investors are increasingly wary of the elevated valuations for the large cap tech names that have propelled the rally. The underweight to the information technology and consumer discretionary sectors, and thus, being underweight to the Magnificent 7, continues to be biggest driver in the recent underperformance for the Diversified Large Cap Equity Portfolio.
- Despite the near term difficulties, the Diversified Large Cap Equity portfolio has achieved a 12.2% on average annually over the past 5 years.

Florida Municipal Pension Trust Fund – DB 70% Equity Allocation
Executive Summary
As of December 31, 2024

FMIvT Diversified Small to Mid Cap Equity Fund

- SMID cap stocks lagged as the risk from higher than expected rates offset the optimism over potential benefits from election results. SMID cap earnings growth has been roughly flat over the last 3 years, and the Fund needs to see the high quality companies held deliver on earnings growth. Despite underperforming in the fourth quarter, the Fund has outpaced the benchmark by 390 basis points over the past 3 years.
- This strategy has generated very strong results over the past 10 years, rising 12.3% on average annually compared with 8.9% for the benchmark. Furthermore, the fund ranked in the top 4th percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMIvT International Equity Portfolio

- The FMIvT International Equity Portfolio's momentum continued to slow in the 4th quarter with the fund falling 5.0% vs. down 7.6% for the MSCI ACWI ex US – Net benchmark. Stock picking in industrials and financials drove performance the most in the 4th quarter. The fund has outperformed the benchmark over the past year (up 6.6% vs. up 5.5%).
- While lagging on a 3 year basis, the portfolio has nearly matched the benchmark over the past 5 years (up 4.0% vs. up 4.1%).
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMIvT Core Real Estate Portfolio

- In early 2023, a \$50 million redemption was submitted in order to rebalance the portfolio with the proceeds scheduled to be paid out over several quarters. This will reduce the total commitment to \$100 million once all the proceeds are received.
- While falling just 1.0% over the trailing one year, the FMIvT Core Real Estate portfolio significantly outperformed the benchmark (down 2.3%) with the large allocation to industrial and apartment properties providing the biggest boost. The office sector has continued to drag on performance with corporate work from home policies increasing vacancies.
- The portfolio has outperformed the NFI ODCE Net benchmark over the past 3 years and has achieved over 180 basis points of excess return over the benchmark over the past 5 years.
