#### Introduction

This report presents the results of the October 1, 2015 actuarial valuation of the City of Satellite Beach General Employees' Retirement System. The report is based on the participant data and asset information provided by the pension plan administrator and, except for a cursory review for reasonableness including a comparison to the data provided for the previous valuation, we have not attempted to verify the accuracy of this information.

The primary purpose of this report is to provide a summary of the funded status of the plan as of October 1, 2015 and to determine the minimum required contribution under Chapter 112, Florida Statutes, for the 2016/17 plan year. In addition, this report provides a projection of the long-term funding requirements of the plan, statistical information concerning the assets held in the trust, statistical information concerning the participant population, and a summary of any recent plan changes.

The liabilities and cost presented in this report are based on numerous assumptions concerning the cost of benefits to be provided in the future, long-term investment returns, and the future demographic experience of the current participants. Anyone referring to this report should remember that the cost developed herein is only an <u>estimate</u> of the true cost of providing post-employment pension benefits. No one can predict with certainty whether the true cost will be higher or lower than the cost presented in this report. The calculated cost is entirely dependent upon the assumptions that are described in Table IV-A. If any of the assumptions is changed, then the cost shown in this report will change accordingly. Likewise, if any of the assumptions is not completely realized, then the cost shown in this report will change in the future.

Certain assumptions play a bigger role than others in determining the cost of the post-employment pension benefits. In some cases, relatively small changes in a particular assumption can have a dramatic impact on the anticipated cost of benefits. Although a thorough analysis of the impact of such changes is beyond the scope of this report, Table I-B illustrates the impact that alternative long-term investment returns would have on the minimum required contribution rate.

#### Minimum Required Contribution

Table I-A shows the development of the minimum required contribution for the 2016/17 plan year. The minimum required contribution is \$349,352, which represents an increase of \$8,216 from the prior valuation.

The normal cost developed in this valuation is \$333,433, which is \$5,734 more than the normal cost from the prior valuation. Table I-C provides a breakdown of the sources of change in the normal cost. Significantly, the normal cost decreased by \$25,270 due to investment gains, decreased by another \$13,865 due to demographic experience, and increased by \$44,869 due to the assumption change described below. The market value of assets only earned 0.25% during the 2014/15 plan year. However, the actuarial value is based on a four-year average of the market value

returns. On this basis, the actuarial value of assets earned 9.32% during the 2014/15 plan year, whereas a 7.75% annual investment return was required to maintain a stable contribution rate.

Chapter 112, Florida Statutes, sets forth the rules concerning the minimum required contribution for public pension plans within the state. Essentially, the City must contribute an amount equal to the annual normal cost of the plan, adjusted to reflect interest on any delayed payment of the contribution beyond the valuation date. On this basis, the City's 2016/17 minimum required contribution is \$349,352.

Based on the current assets, participant data, and actuarial assumptions and methods that are used to value the plan, the present-day value of the total long-term funding requirement is \$8,055,564. As illustrated in Table I-A, current assets are sufficient to cover \$6,660,031 of this amount, the employer's 2015/16 contribution will cover \$341,136 of this amount, the employer's 2016/17 contribution will cover \$349,352 of this amount, and future employee contributions are expected to cover \$122,254 of this amount, leaving \$582,791 to be covered by future employer funding beyond the 2016/17 fiscal year. Again, demographic and investment experience that differs from that assumed will either increase or decrease the future employer funding requirement.

#### Contents of the Report

Tables I-D through I-G provide a detailed breakdown of various liability amounts by type of benefit and by participant group. Tables II-A through II-F provide information concerning the assets of the trust fund. Specifically, Table II-A shows the development of the actuarial value of assets, which is based on the four-year average return on the market value of assets in order to provide a more stable and predictable contribution rate for the employer. Tables III-A through III-G provide statistical information concerning the plan's participant population. In particular, Table III-G gives a 10-year projection of the cash that is expected to be required from the trust fund in order to pay benefits to the current group of participants. Finally, Tables IV-A through V-B provide a summary of the actuarial assumptions and methods that are used to value the plan's benefits and of the relevant plan provisions as of October 1, 2015, as well as a summary of the changes that have occurred since the previous valuation report was prepared.

#### Assumption Change

Since the previous valuation was completed, the interest (or discount) rate has been reduced from 7.75% per annum to 7.50% per annum. This change increased the normal cost for the 2016/17 plan year by \$44.869.

### Certification

This actuarial valuation was prepared by me or under my direct supervision and I acknowledge responsibility for the results. To the best of my knowledge, the results are complete and accurate and, in my opinion, the techniques and assumptions used are reasonable and meet the requirements and intent of Chapter 112, Florida Statutes. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs

have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material change in plan costs or required contribution rates have been taken into account in the valuation.

For the period October 1, 2024 through September 30, 2025	\$719,367

Actual

### Summary of Actuarial Methods and Assumptions

Table IV-A

#### 1. Actuarial Cost Method

Aggregate cost method. Under this actuarial cost method, a funding cost is developed for the plan as a level percentage of payroll. The level funding percentage is calculated as the excess of the total future benefit liability over accumulated assets and future employee contributions, with this excess spread over the expected future payroll for current active participants. The normal cost is equal to the level funding percentage multiplied by the expected payroll for the year immediately following the valuation date. The actuarial accrued liability is equal to the accumulated assets. Therefore, under the aggregate cost method, no unfunded accrued liability is developed.

#### Asset Method

The actuarial value of assets is equal to the prior year's actuarial value of assets adjusted for contributions, benefit payments, and expenses and further adjusted by the average return on the market value of assets for the preceding four years; the actuarial value of assets is restricted to 80% to 120% of the market value.

#### 3. Interest (or Discount) Rate

7.50% per annum

#### 4. Salary Increases

Plan compensation is assumed to increase at the rate of 4.75% per annum, unless actual plan compensation is known for a prior plan year.

#### 5. Decrements

Pre-retirement mortality: Sex-distinct rates set forth in the RP-2000 Mortality Table for non-annuitants,

projected to 2007 by Scale AA, as published by the Internal Revenue Service (IRS) for purposes of Internal Revenue Code (IRC) section 430; future

generational improvements in mortality have not been reflected.

Post-retirement mortality: Sex-distinct rates set forth in the RP-2000 Mortality Table for annuitants,

projected to 2007 by Scale AA, as published by the Internal Revenue Service (IRS) for purposes of Internal Revenue Code (IRC) section 430; future

generational improvements in mortality have not been reflected.

Disability: Sex-distinct rates set forth in the Wyatt 1985 Disability Study (Class 1);

No disabilities are assumed to be service-related.

### Summary of Actuarial Methods and Assumptions

### Table IV-A

(continued)

Termination: Sex-distinct rates set forth in the Scale 155 Table

• Retirement: Retirement is assumed to occur upon the attainment of age 62 with at least

five years of service, except that those participants who have attained their normal retirement age as of the valuation date are assumed to retire one year after the valuation date. Alternatively, participants who have earned at least 35 years of service are assumed to retire at the rate of 5.00% per annum and participants who have attained age 55 with between 10 years of service and 35 years of service are assumed to retire at the rate of 2.50% per annum.

#### Form of Payment

Future retirees have been assumed to select the 10-year certain and life annuity.

#### 7. Beneficiary Age and Gender

Where beneficiary information is unavailable, beneficiaries have been assumed to be of the opposite gender of the participant, with males assumed to be three years older than females.

#### 8. Expenses

Administrative expenses are assumed to be 1.75% of future payroll. In addition, the interest rate set forth in item 4. above is assumed to be net of investment expenses and commissions.

### Changes in Actuarial Methods and Assumptions

Table IV-B

Since the previous valuation was completed, the interest (or discount) rate was decreased from 7.75% per annum to 7.50% per annum.

Table V-A

#### 1. Benefit Formula

3% of Average Monthly Earnings multiplied by Credited Service earned prior to October 1, 2010 or after September 30, 2013 plus 2% of Average Monthly Earnings multiplied by Credited Service earned during the period October 1, 2010 through September 30, 2013 (§46-33(b)(1))

#### 2. Service Retirement

Normal retirement: Age 62 with at least five years of participation (§46-33(a)(1))

Early retirement: Any age with at least 35 years of credited service; or

Age 55 with at least 10 years of credited service

(§46-33(a)(2))

(Note: In the case of early retirement, the participant's benefit is reduced by  $^{1}/_{15}$  for each of the first five years plus  $^{1}/_{30}$  for each of the next five years by which the participant's early retirement age precedes his normal retirement age.) (§46-33(b)(2))

#### 3. Disability Retirement

Service-based disability: Participant must be disabled during the course of his employment with the City.

(§46-33(c)(1))

Non-service disability: Participant must have earned at least 10 years of credited service. (§46-33(c)(1))

The disability benefit is a monthly life annuity equal to the larger of the monthly accrued benefit or either 42% of average monthly earnings (for service-based disability) or 25% of average monthly earnings (for non-service disability), but offset as necessary to preclude the total of the participant's worker's compensation, disability benefit, and other City-financed disability or salary continuation benefit (excluding social security benefits) from exceeding his average monthly earnings. A partial month's payment is made to cover the period between the date of the Board's approval and the end of the month. (§46-33(c)(4),(5),&(6))

(A participant is disabled if he is found to be mentally or physically incapacitated so as to be wholly unable to properly perform his duties as an employee of the City and is likely to remain so disabled continuously and permanently. However, a participant will not be eligible for a disability benefit if his disability is caused by excessive and habitual use of drugs, intoxicants, or narcotics; by injury or disease sustained while serving in the armed forces; by injury or disease sustained while willfully and illegally participating in fights, riots, or civil insurrections, or while committing a crime; by injury or disease sustained after termination of employment; or by a self-inflicted injury.) (§§46-33(c)(1)&(2))

Table V-A

(continued)

#### 4. Deferred Vested Retirement

A vested participant who terminates employment before becoming eligible for retirement receives a deferred vested retirement benefit payable at the participant's early or normal retirement age. If the benefit is payable prior to normal retirement age, then the benefit is actuarially reduced to account for the earlier commencement of the benefit. (§46-33(e)(1))

A non-vested participant who terminates employment receives his accumulated contributions. (§46-33(e)(2))

#### Vesting

A participant becomes 100% vested upon the attainment of five years of credited service. For this purpose, service includes service earned under the City of Satellite Beach Police Officers' and Firefighters' Retirement System. (§46-33(e)(1))

#### 6. Pre-Retirement Death Benefit

If a vested participant dies prior to retirement, the participant's beneficiary receives a 10-year certain annuity equal to the participant's monthly accrued benefit payable beginning at the participant's early or normal retirement age. At the beneficiary's election and upon approval by the Board of Trustees, an actuarially equivalent benefit is payable at any time following the participant's death. In any event, the pre-retirement death benefit guarantees at least the return of the participant's accumulated contributions. (§46-33(d))

If a non-vested participant dies prior to retirement, the participant's beneficiary receives the participant's accumulated contributions. (§46-33(d)(1))

#### 7. Form of Payment

Actuarially increased single life annuity (optional);

10-year certain and life annuity (normal form of payment);

Actuarially reduced 50% joint and contingent annuity with a relative as the joint annuitant (optional);

Actuarially reduced 662/3% joint and contingent annuity with a relative as the joint annuitant (optional);

Actuarially reduced 75% joint and contingent annuity with a relative as the joint annuitant (optional);

Table V-A

(continued)

Actuarially reduced 100% joint and contingent annuity with a relative as the joint annuitant (optional); or

Any other actuarially equivalent form of payment approved by the Board of Trustees (optional)

(Note: All forms of payment guarantee at least the return of the participant's accumulated contributions.)

(§46-33(b)(1), §46-34, & §46-35(a)(2))

#### 8. Average Monthly Earnings

Average monthly earnings during the highest consecutive three years out of the 10 years immediately preceding the determination. Earnings include base pay, commissions, bonuses, maintenance pay, and overtime pay, but exclude accrued sick leave and vacation pay. Earnings cannot exceed the maximum amount allowed under IRC section 401(a)(17). (§46-31)

#### 9. Credited Service

The service, expressed in years and completed months, from the participant's date of hire until his date of termination, retirement, or death, excluding periods during which the participant does not make the required employee contribution. Participants may also purchase up to five years of credited service for previous employment with any federal, state, county, or city government, including military service, by paying into the plan the full actuarial cost thereof, provided that no other retirement benefit is paid for such service. Payment for purchased service must be made within a period of time equal to the length of service being purchased. Where part-time service is purchased, the additional credited service granted is pro-rated accordingly. (§46-31 & §46-42(b))

### 10. Employee Contribution

Employees must contribute 8.00% of earnings and such contributions are accumulated with interest at the rate of 5.50% per annum. (§46-31)

#### City Contribution

The City is required to make quarterly contributions as determined in the most recent actuarial valuation of the retirement system. (§46-35(b))

Table V-A

(continued)

#### 12. Deferred Retirement Option Plan (DROP)

A DROP is available to those participants who are at least age 57 and who have attained their early or normal retirement age, whereby the participant's monthly retirement benefit is accumulated on his behalf in a DROP account while he continues in active employment with the City. Individuals may participate in the DROP for a period of 12 to 60 months and neither earn additional benefits nor make the required employee contribution during the period of their DROP participation. DROP participants are considered to be retired for all other purposes under the plan and are not eligible for disability or pre-retirement death benefits. DROP accounts earn interest equal to the investment return realized by the market value of assets. (§46-41)

#### 13. Participant Requirement

Only those individuals who were participants in the plan as of September 30, 1996 are eligible to continue their participation after that date. However, the City Manager was allowed to enter the plan on July 31, 2005 by contributing 50.1% of the cost of his past service credit. (§46-32(a) & §46-42(a))

#### Actuarial Equivalence

Based on 8.00% interest per annum and the 1984 Uninsured Pensioner Mortality Table (§46-31)

#### 15. Retiree Increases

Retirement benefits in payment status on October 1, 1997 were increased by 1.00%. (§46-33(b)(3))

### 16. Plan Effective Date

The plan was originally effective on May 22, 1973.

### 17. Special Retirement Window

A special retirement window was available to participants who had attained age 59 with at least 25 years of service as of June 1, 2012 whereby the participant was eligible to receive a normal retirement benefit effective July 1, 2012 provided that the participant applied for retirement within 10 days following the passage of the ordinance.

# Summary of Plan Amendments

Table V-B

No significant plan changes were adopted since the completion of the previous valuation.
