
Florida Municipal Pension Trust Fund – DB 50% Equity Allocation

Executive Summary

As of March 31, 2018

50% Equity Allocation

- ◆ The 50% Equity Allocation was well positioned to take advantage of the first quarter headwind in the equity markets, falling 0.2% over the quarter compared with a decline of 0.7% for the target index and ranking above median within the public fund peer group.
- ◆ This allocation posted strong results over the past year, rising 8.5% and outpacing the target index (up 8.0%), while slightly trailing the public fund peer group (up 9.6%).
- ◆ Over the past 10 years, this allocation is up 5.8% on average annually. While this performance is modestly behind objectives, the risk controlled nature of many of the underlying strategies are designed to provide downside protection should the markets moderate or decline.
- ◆ An allocation to the new FMlvt Core Real Estate Portfolio was added in the latest quarter and will be fully implemented as the manager of the strategy calls down the remaining commitment over the next several quarters.

FMlvt Broad Market High Quality Bond Fund

- ◆ The Broad Market High Quality Bond Fund outpaced the BloomBar Capital Aggregate A+ Index in the first quarter with the limited allocation to investment grade credit and mortgage-backed securities providing a boost.
- ◆ The fund has displayed a consistent pattern of performance, posting absolute returns of 3.1% on average annually over the past 10 years. This slightly trails the benchmark (up 3.3%), with the high quality focus providing a headwind, particularly over the past several years.
- ◆ The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMlvt Core Plus Fixed Income Fund

- ◆ The Core Plus Fixed Income Fund struggled in the first quarter (up 0.5%) compared to the BloomBar Multiverse (up 1.3%). However, in the 4 years since inception, the fund has generated returns of 2.6% annually, well ahead of the index (up 1.6%), and ranks above median compared to the peer universe of global unconstrained fixed income managers.
- ◆ The Core Plus Fixed Income Fund was added to the FMlvt lineup in April 2014 to provide broad global fixed income exposure, through equal allocation to two strategies (Amundi Pioneer Multi-Sector Fixed Income Fund and the Franklin Templeton Global Multi-Sector Plus Fund).

Florida Municipal Pension Trust Fund – DB 50% Equity Allocation

Executive Summary

As of March 31, 2018

FMIvT Diversified Large Cap Equity Portfolio

- ◆ The Diversified Large Cap Equity Portfolio was created in October 2017. The fund is allocated 60% to the FMIvT Russell 1000 Enhanced Index Portfolio, and 20% each to the FMIvT Diversified Value Portfolio and the FMIvT High Quality Growth Portfolio. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity space.
- ◆ This strategy bounced back after a difficult fourth quarter by outperforming the Russell 1000 in the first quarter by 140 bps (0.7% vs -0.7%) while ranking in the top quartile of large cap core managers. Strong results for the growth and core strategies were key drivers to the outperformance in the quarter.

FMIvT Diversified Small to Mid Cap Equity Fund

- ◆ Positive stock selection drove this strategy to another strong quarter, posting a 1.3% return in the first quarter compared to the benchmark return of -0.2% while also ranking in the top quartile compared to their peer group of US small-mid cap core equity managers.
- ◆ This strategy has generated very strong results over the past 10 years, rising 14.8% on average annually compared with 10.3% for the benchmark. Furthermore, the fund ranked in the top 2nd percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMIvT International Equity Portfolio

- ◆ In October 2017, a ten percent allocation to emerging markets (Wells Capital Berkeley Street Emerging Markets Fund) was added to this portfolio. The portfolio struggled to keep pace with the MSCI ACWI ex US in the first quarter (-2.6% vs -1.1%) with stock selection in the technology and materials sectors providing a headwind.
- ◆ This FMIvT International Equity portfolio modestly lagged the international markets over the past 3 years, but has posted strong absolute returns over that time period (up 5.7%).
- ◆ This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMIvT Core Real Estate Portfolio

- ◆ This fund was added to the FMIvT early this year with the objective to provide broad exposure to the core real estate markets.
- ◆ In March 2018, the manager (Morgan Stanley Prime Property Fund) called down an initial commitment of \$25 million which will grow as further capital calls are initiated over the next several quarters.

Florida Municipal Investment Trust
Protecting Florida Investment Act - Quarterly Disclosure
As of March 31, 2018

This Disclosure is intended to provide information with respect to Chapter 175 and 185 Police and Fire Plan's required disclosure of direct or indirect holdings in any "scrutinized companies" as defined in the FSBA PFIA Quarterly Report for Quarter 1 2018.

It is important to note that individual Police and Fire Plan's have no direct interests in any scrutinized companies. Police and Fire Plan's hold an interest in the Florida Municipal Pension Trust Fund. It is also important to note that the Florida Municipal Pension Trust Fund has no direct interests in any scrutinized companies as all of its interests are invested in the Florida Municipal Investment Trust.

The Florida Municipal Investment Trust is the only entity that could possibly have direct interests in any scrutinized companies. ACG has reviewed the **Protecting Florida's Investments Act (PFIA) Quarterly Report-March 7, 2018** that is available on the Florida SBA website. In particular we have reviewed the list of companies appearing in **Tables 1 and 3- Scrutinized Companies with Activities in Sudan and Iran**, and compared these lists to securities of companies held directly by the Florida Municipal Investment Trust. As of 3/31/18, the Florida Municipal Investment Trust had no direct interest in securities on the above referenced lists.

ACG also requested that investment managers, who manage commingled funds that are owned by the Florida Municipal Investment Trust, review the **Protecting Florida's Investments Act (PFIA) Quarterly Report-March 7, 2018** and disclose whether the Florida Municipal Investment Trust may hold any scrutinized companies indirectly through investment in their respective commingled funds. They have confirmed that they do not hold any of these securities.

Global Long-Only Equity

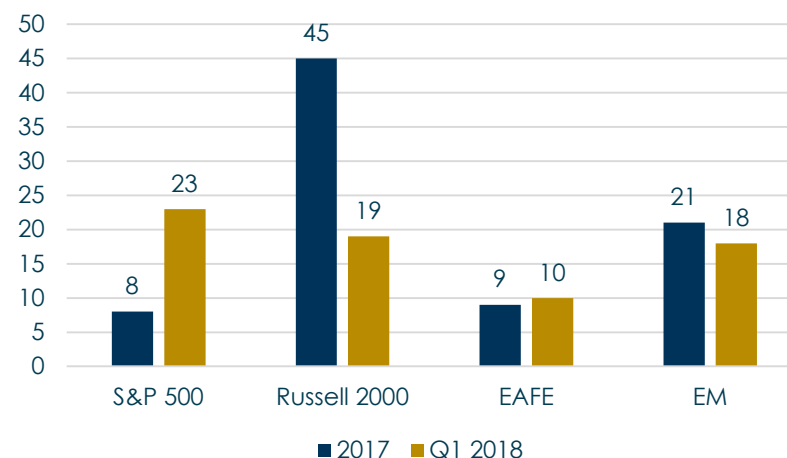

After an extended period of uncharacteristically low volatility in equity markets, the **current year kicked off with a return to more unpredictability**. The market lacked trading days where the equity indices returns exceeded a magnitude greater than +/-1% in 2017 outside of domestic small caps. Many indices surpassed the 2017 count in just the first quarter as **rhetoric shifted from tax reform benefits to a potential trade war and fears of increased inflation**, leading to consternation among investors.

US Large Caps started out the year with strong gains of 8% in the S&P 500 for the month of January (mainly from large gains in the IT sector). However, **investors' enthusiasm waned in February and March** causing the S&P 500 to end down 1% for the quarter with the bulk of the decline coming from the Consumer Staples, Energy, and Materials sectors.

After trailing in 2017, **US Small Caps outperformed** Large Cap peers and ended the quarter only slightly down at -0.1% as measured by the Russell 2000. This isn't to say small caps lacked volatility as the group had January gains erased in February and rebounded in March. Quarterly gains in excess of 6% in both the IT and Healthcare sectors along with a slight gain in Financials helped to offset declines in the remaining eight sectors.

Non-US equities had a strong start to the year, only to falter in February and March. Sector strength shifted from cyclical to more defensive names during the quarter in developed markets, with cyclicals ceding leadership to more defensive sectors such as Staples and Utilities. In emerging markets, the slowdown was more widespread, with almost all major sectors posting declines in March.

Global Long/Short Equity

Market Volatility Returns

Sources: Bloomberg, ACG Research

Market **volatility** has returned, spiking **from historical lows in 2017** up to levels seen only once since 2011 and well above the twenty year average. Volatility increased due to rising interest rates, concern about a trade war and uncertainty about mid-term elections. This coincided with negative performance in global equities in 1Q-18, providing equity long/short managers the chance to showcase their ability to **protect on the downside**. The increase in volatility should provide opportunities for managers to generate returns on both the long and the short side of their portfolios.

Managers are excited about the equity outlook, given the expectation that **sectors and companies** should experience an **increase in dispersion** and lower correlations in the coming year. The removal of free money should cause stocks to behave more rationally. These are key elements to a **positive opportunity set for equity long/short stock pickers**.

The volatility has not deterred managers from remaining invested. US **gross exposure** is at **post-crisis highs** both due to managers adding shorts as well as buying longs during recent market weakness. Net exposure remains near the historical average.

Long term growth opportunities continue in **Europe** driven by low rates, bank lending, corporate expansion and consumer confidence. We anticipate this to remain an area of opportunity for the foreseeable future. The outlook for **event driven** strategies is **less positive** as the ongoing involvement of the Trump administration has led to the postponement or **termination** of some **potential deals**.

Global Private Equity

Much like public markets, valuations remain high for new deals in private markets. The **median acquisition price for a private equity-backed company purchased in 2017 was 10.7x EBITDA**, setting an all-time high. Although purchase price multiples are a full turn higher than 2007, the composition of the price is much different today. The average buyout in 2007 was financed with 69% debt compared to the 59% debt used in buyouts completed in 2017. Factoring in the much lower debt servicing costs (average 3-month LIBOR was 1.3% in 2017 compared to 5.3% in 2007), the buyouts of 2017 should be in better position to weather a downturn than the buyouts of 2007.

Strong investor appetite for private equity funds led to continued fundraising success for the industry in 2017. **Private equity funds closed in 2017 raised \$485 billion, surpassing the previous high water mark of \$440 billion set in 2016.** Several years of robust fundraising have led to a record level of "dry powder" within the private equity system. After reaching a post-financial crisis trough of \$606 billion in 2012, **private equity funds are sitting on more than \$1.0 trillion of capital** that has been raised but not yet deployed. The record amount of capital on the sideline could keep purchase price multiples high for the foreseeable future.

High purchase prices today are likely to translate into lower returns going forward. The best managers recognize that **high multiples are unlikely to continue indefinitely and that patience and asset selection is key to driving strong investment outcomes** in this environment.

Private Equity Fundraising and Dry Powder

Global Real Assets

NCREIF Income Return Spread to Treasuries

US real estate assets continue to benefit from a solid economic outlook and low levels of new supply. The NCREIF Property Index is expected to post its 32nd consecutive quarter of positive appreciation in 1Q-18. This is 10 quarters longer than the second longest winning streak since the benchmark's inception in 1978. In 4Q-17, NCREIF annualized income returns (a proxy for cap rates) increased 10 bps to end at 4.64%. **The spread between NCREIF income returns and the 10-year UST yield ended the year at 224 bps, 59 bps tighter than the median spread since 2000.**

As we enter the ninth calendar year of the real estate recovery and expansion, **the potential for higher interest rates could put upward pressure on cap rates and lower future core real estate returns.** Furthermore, tariffs and protectionist policies could cause ex-US investors to leave the market, dampening demand for core real estate assets. Given the current market dynamics, **real estate funds which emphasize income, as opposed to appreciation, should outperform the broader market.**

Although losing 0.4% during the quarter, the Bloomberg Commodity Index (BCOM) outperformed the Bloomberg Barclays US Aggregate Bond Index by 106 bps, the S&P 500 by 36 bps, and the MSCI ACWI by 51 bps. **Commodities could be entering an attractive return environment for the remainder of 2018.** Energy ended 1Q-18 at its highest level of backwardation in more than 10 years, indicating markets that are under-supplied. Synchronized global growth is generally bullish for commodities and precious metals should perform well during periods of high volatility. On the other hand, commodities could feel pressure during a "risk-off" period and the sector's reaction to potential tariffs will not be known for some time.

Global Traditional Bond Markets

Amid escalating market volatility and concerns of an upside surprise to inflation, Jerome Powell assumed the role of Chairman at the **Federal Reserve**. The 25 bps hike in March supported the expectation of a seamless transition. Despite a more optimistic tone around growth, the "dot plot" that aggregates individual projections continues to suggest only two more quarter-point hikes in 2018. The **US Treasury market adjusted** throughout 1Q-18, with longer-term rates moving materially higher before softening late in the period as risk-off sentiment took hold. The domestic yield curve ultimately flattened further, as two-year rates continued their steady advance in conjunction with central bank action.

The **BloomBar Aggregate** suffered a notable loss, with government-related issues falling victim to rate sensitivity and IG corporates experiencing wider credit spreads. For the first time since April 2011, however, the yield-to-maturity for the index has moved beyond 3.0%.

High Yield traded down in sympathy with equities. Index spreads widened by 35 bps from January's tight, and CCC-rated issues underperformed as the credit curve steepened. Floating-rate bank loans have been a bright spot year-to-date.

Municipal Bonds posted mixed results relative to taxable counterparts, as the tax-exempt yield curve exhibited a contradictory steepening bias. As higher overall yields enhance the value of tax-exempt income, municipals historically outperform in rising rate periods.

Unhedged Global government bonds outperformed domestic counterparts as the US dollar's decline aided returns. Local currency **Emerging Markets** remain particularly solid.

Current Rate Hiking Cycle

Sources: Bloomberg, ACG Research

Global Nontraditional Fixed Income

Percentile Rankings of Observations for Past 15-Years

Sources: Bloomberg, ACG Research

Liquid Absolute Return strategies produced favorable results in 1Q-18, outperforming traditional bond benchmarks by ~200 bps. The diversification of risk factors within portfolios remains valuable, as this aids in downside protection and reduces key correlations. The commonly referenced 90-Day T-Bills +3% to +6% objective becomes more challenging as cash rates increase, but **enhanced volatility in rates, spreads, and currency should provide opportunities**.

Alternative investment managers earn their keep when beta-driven investment opportunities become scarce. While rate-sensitive assets booked losses, fixed-income hedge funds tended toward flat to positive performance through the end of February. Cognizant of the risks of extended valuations, absolute return managers have communicated a willingness to remain invested, on the long side, but with attention to asset quality. If valuations continue to stretch higher, **we expect absolute return managers will increasingly exploit idiosyncratic opportunities in challenged sectors** of the market.

Private Credit strategies (typically 5-10-year terms) offer the opportunity to earn both a credit spread and an illiquidity premium versus publicly traded fixed income strategies. **Fundraising in the sector remains strong. Preqin reported 156 private debt funds held a final close on \$115 billion of commitments in 2017.** Distressed strategies have not seen much opportunity as the overall default environment remains well below crisis levels. However, economic expansions historically last five years and we are more than eight years into the current expansion. **The proliferation of covenant-lite leveraged loans, an aging economic expansion, and rising interest rates (3-month LIBOR increased 60 bps in 1Q-18) could lead to a robust opportunity set for distressed strategies in the coming quarters.**
