Florida Municipal Pension Trust Fund – DB 50% Equity Allocation Executive Summary

As of December 31, 2018

50% Equity Allocation

- Difficult equity market performance in the fourth quarter hindered the results for the 50% Equity Allocation as it modestly trailed the target index (down 6.4% vs. down 6.2%).
- This allocation struggled to keep up with the benchmark over the past year (down 4.0% vs. down 3.0%), but it outpaced the public fund peer group (down 4.5%), ranking in the top 37th percentile.
- Over the past 10 years, this allocation is up 7.1% on average annually. While this performance is modestly behind objectives, the risk controlled nature of many of the underlying strategies are designed to provide downside protection should the markets moderate or decline.

FMIvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund posted strong fourth quarter results (up 2.2%) outperforming the BloomBar US Aggregate A+ benchmark (2.0%). This strategy also outpaced the benchmark by 83 basis points while also ranking in the top 5th percentile of its peer group of US Core Fixed Income managers over the past year.
- The fund has displayed a consistent pattern of performance, posting absolute returns of 2.7% on average annually over the past 10 years. This slightly trails the benchmark (up 3.1%), with the high quality focus providing a headwind, particularly over the past several years.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMIvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund (up 1.1%) outperformed the BloomBar Multiverse (up 1.0%) in the fourth quarter while also ranking in the 5th percentile of its peer group of Global Unconstrained Fixed Income managers.
- In the 4 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 2.6% on average annually, outperforming the benchmark (up 1.4%) by over 120 basis points.
- The Core Plus Fixed Income Fund was added to the FMIvT lineup in April 2014 to provide broad global fixed income exposure, through equal allocation to two strategies (Amundi Pioneer Multi-Sector Fixed Income Fund and the Franklin Templeton Global Multi-Sector Plus Fund).

Florida Municipal Pension Trust Fund – DB 50% Equity Allocation Executive Summary

As of December 31, 2018

FMIvT Diversified Large Cap Equity Portfolio

- The Diversified Large Cap Equity Portfolio was created in October 2017. The fund is allocated 60% to the Intech US Broad Enhanced Plus Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity space.
- This strategy struggled to keep up with the Russell 1000 in the fourth quarter, falling 14.5% compared to a 13.8% decline for the benchmark due to the challenging results for the core and value strategies.
- Exposure to US large cap growth stocks has been extremely additive over the most recent time periods with the Atlanta Capital High Quality Growth Fund posting the strongest 1 year results (up 5.8%) of all equity accounts in the FMIvT lineup.

FMIvT Diversified Small to Mid Cap Equity Fund

- This strategy experienced the most pain in the fourth quarter, retreating 16.4%. However, the portfolio outperformed its benchmark by over 210 basis points while also ranking in the top 32nd percentile of US Small-Mid Cap Core Equity managers.
- This strategy has generated very strong results over the past 10 years, rising 16.0% on average annually compared with 12.6% for the benchmark. Furthermore, the fund ranked in the top 18th percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMIvT International Equity Portfolio

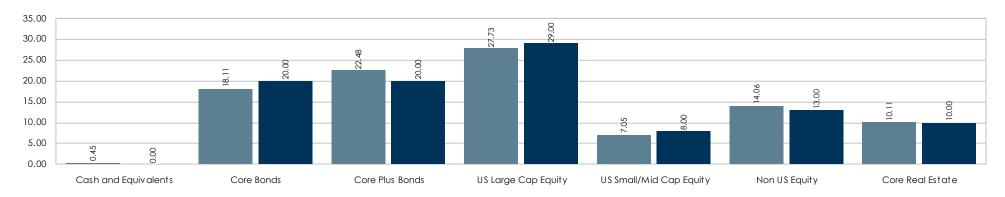

- In October 2017, a ten percent allocation to emerging markets (Wells Capital Berkeley Street Emerging Markets Fund) was added to this portfolio.
- The portfolio lagged the MSCI ACWI ex US in the fourth quarter (-12.7% vs -11.4%) with an overweight position in the underperforming emerging markets and industrials sectors, and poor allocation and stock selection in the materials sector providing a headwind.
- This portfolio failed to keep up with the international markets over the past 10 years, but has posted strong absolute returns over that time period (up 4.5% on average annually).
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMIvT Core Real Estate Portfolio

- This fund was added to the FMIvT early this year with the objective to provide broad exposure to the core commercial real estate markets.
- In June 2018, the manager (Morgan Stanley Prime Property Fund) called down an additional commitment of \$75 million which increases the total commitment thus far to \$100 million.
- The FMIvT Core Real Estate Portfolio (up 2.2%) outperformed the NFI ODCE Net benchmark (up 1.5%) in the fourth quarter, and has outpaced the benchmark by 116 basis points in the 9 months since inception.

⁵ SMID Benchmark: Effective June 2010, the index consists of 100% Russell 2500.

⁶ Wells Capital EM was added to the portfolio in October 2017. Portfolio renamed and manager changed in October 2014 and April 2011.

Florida Municipal Investment Trust Protecting Florida Investment Act - Quarterly Disclosure

As of December 31, 2018

This Disclosure is intended to provide information with respect to Chapter 175 and 185 Police and Fire Plan's required disclosure of direct or indirect holdings in any "scrutinized companies" as defined in the FSBA PFIA Quarterly Report for Quarter 2 2018.

It is important to note that individual Police and Fire Plans have no direct interests in any scrutinized companies. Police and Fire Plans hold an interest in the Florida Municipal Pension Trust Fund. It is also important to note that the Florida Municipal Pension Trust Fund has no direct interests in any scrutinized companies as all of its interests are invested in the Florida Municipal Investment Trust.

The Florida Municipal Investment Trust is the only entity that could possibly have direct interests in any scrutinized companies. ACG has reviewed the **Protecting Florida's Investments Act (PFIA) Quarterly Report-December 4, 2018** that is available on the Florida SBA website. In particular we have reviewed the list of companies appearing in **Tables 1 and 3- Scrutinized Companies with Activities in Sudan and Iran**, and compared these lists to securities of companies held directly by the Florida Municipal Investment Trust. As of 9/30/18, the Florida Municipal Investment Trust had no direct interest in securities on the above referenced lists.

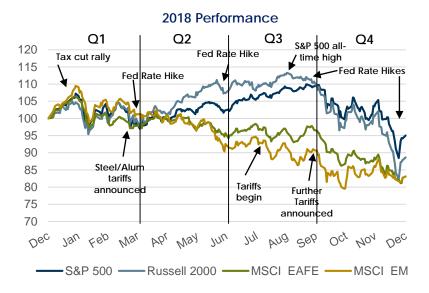

ACG also requested that investment managers, who manage commingled funds that are owned by the Florida Municipal Investment Trust, review the **Protecting Florida's Investments Act (PFIA) Quarterly Report-December 4, 2018** and disclose whether the Florida Municipal Investment Trust may hold any scrutinized companies indirectly through investment in their respective commingled funds. The Florida Municipal Pension Trust holds units in the FMIvT Core Plus Fixed Income Fund. The FMIvT Core Plus Fixed Income Fund owns units in the Amundi Pioneer Global Multisector Fixed Income Fund does hold two securities on the list, **CNOOC Nexen Finance and Sinopec Group Overseas Development**, which represents 0.35% of the market value of their portion of the FMIvT Core Plus Fixed Income Fund. The Florida Municipal Pension Trust also holds units in the FMIvT International Equity Portfolio. The FMIvT International Equity Portfolio owns units in the Investec International Dynamic Equity Fund and the Wells Fargo Emerging Markets Large-Mid Cap Equity Fund. Both the Investec International Dynamic Equity Fund and the Wells Fargo Emerging Markets Large-Mid Cap Equity Fund hold **CNOOC Ltd**, which represents 1.96% and 1.36% of their respective portions of the FMIvT International Equity Portfolio. All other managers have confirmed that they do not hold any of these securities.

Global Long-Only Equity

Equity markets retreated across 4Q-18, erasing prior 2018 Domestic Equity gains and further driving International market declines. Stocks earlier in the year benefited from a healthy economic backdrop strengthened by tax cuts, favorable repatriation dynamics, strong employment, and rising consumer sentiment. However, concerns over the pace of interest rate hikes, Brexit, inflation, and heightened valuations appeared strongly in the markets as we moved into 4Q-18, which sharply accelerated into December. Still, our conversations with managers suggest optimism in the economic outlook and many have viewed the correction as a buying opportunity.

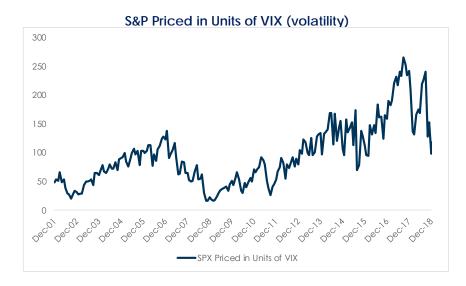

Nearly all sectors declined in the quarter across US Small-to-Large Cap equities. Sectors that had previously posted the strongest returns and highest valuations retreated the most, highlighted within the high-growth sectors such as IT or Healthcare. US Small Caps experienced the most pain in the quarter moving into bear territory with a 20.2% drop in the Russell 2000 for the quarter, wiping out all previous gains for a -11% decline in 2018.

Developed markets, following a 1% drop in September, declined 13% in 4Q-18. All major developed countries contributed to the decline on concerns over global growth and Brexit. Emerging markets declined 7% in the quarter and posted a -14% decline for the full-year as trade issues continue to impact the space. China (-11%) and South Korea (-13%), in particular, continue to struggle, as Technology/Consumer names such as Tencent, Alibaba and Samsung were particularly weak.

Sources: Bloomberg, ACG Research

Global Long/Short Equity

Sources: Bloomberg, ACG Research

Volatility made a dramatic return in 4Q-18 after the global indices had reached historic highs in September. Exposure typically decreases into year-end but the volatility triggered equity long short managers to reduce gross exposure to the lowest year-end level since 2011 (compared to the highest year-end gross in 2017). Often volatility is a positive factor for equity long/short managers as it can provide opportunities for managers to generate returns on both the long and the short side. During the recent extreme volatility, however, stocks within sectors moved together and did not create the dispersion between top and bottom companies that is necessary for strong equity long/short performance. Dispersion fell to the lowest level since 2008, reducing the opportunity set for equity long short managers.

Most equity long/short managers provided protection during the negative months in 2018 despite the reduced exposure. Equity long/short managers generally remain optimistic about the opportunity set and have a positive view on the economy. They believe companies are not trading on fundamentals (as evidenced by the lack of dispersion) and they are using the volatility to selectively add to names. The chart to the left shows the S&P priced in units of volatility has not been this low in three years.

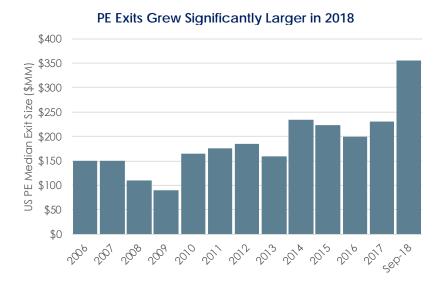

Technology and Health Care remain key areas of interest as historically there has been a large amount of dispersion between winners and losers in these sectors. M&A activity has continued in these sectors as well, with large deals being announced despite the market disruption.

Global Private Equity

Valuations remain high for new deals in private markets, reaching a new all-time high in 3Q-18. While the effects of public equity markets' weakness in 4Q-18 are not yet known, we will be watching closely to see how much of an impact lower public multiples have on private valuations. The median acquisition price for a private equity-backed company purchased in 3Q-18 was 11.0x EBITDA, up from 2017's previous high of 10.7x and well above the pre-crisis peak in 2007 of 9.7x. Rising interest rates combined with the possibility of slowing economic growth continue to pose risks to private equity-backed companies.

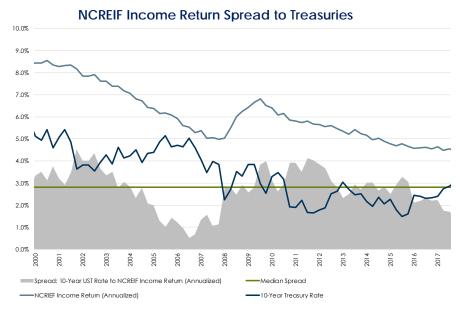

In 2018, private equity sponsors took advantage of market conditions to exit larger businesses with a median exit size through 3Q-18 of \$354 million, well above the \$200-\$240 million range of the past five years. This has been driven in part by greater appetite for large acquisitions by strategic purchasers, whose median PE-backed acquisition increased from \$150 million in 2017 to \$313 million in 2018.

High purchase prices are likely to translate into lower returns for select vintages. The best managers recognize that high multiples are unlikely to continue indefinitely and that patience and asset selection is key to driving strong investment outcomes in this environment.

Sources: Pitchbook, ACG Research

Global Real Assets

Sources: NCREIF, ACG Research

US real estate assets continue to benefit from a solid economic outlook and generally low new supply. The NCREIF Property Index is expected to post its 35th consecutive quarter of positive appreciation in 4Q-18. This is 13 quarters longer than the second longest winning streak since the benchmark's inception in 1978. In 3Q-18, NCREIF annualized income returns (a proxy for cap rates) decreased 12 bps to end at 4.44%. As interest rates continued to rise, the spread between NCREIF income returns and the 10-year US Treasury yield ended the quarter at 138 bps, tightening 32 bps and approximately 143 bps tighter than the median spread since 2000.

Though there have been no significant impacts to real estate valuations so far, more prolonged periods of higher interest rates could put upward pressure on cap rates and lower future real estate returns. Real estate market fundamentals remain relatively solid, with no imminent signs of a dramatic imbalance between supply and demand outside of the long-challenged retail sector, while industrial assets in key markets continue to enjoy above-trend appreciation. Cap rates remain near their all-time lows, and while further cap rate compression is possible, core real estate funds focused on income may outperform those focused on generating appreciation in the intermediate term, particularly in the event of softness in real estate valuations.

The Bloomberg Commodity Index (BCOM) fell -9.4% in 4Q-18, underperforming the Bloomberg Barclays US Aggregate Bond Index by 11.1% and outperforming the S&P 500 and MSCI ACWI by 4.1% and 3.3%, respectively. Any signs of rising inflation may be positive for commodities broadly, though growing concerns regarding slowing global economic growth, the strength of the US dollar, and trade tensions may drive continued volatility in the near term.

Global Traditional Bond Markets

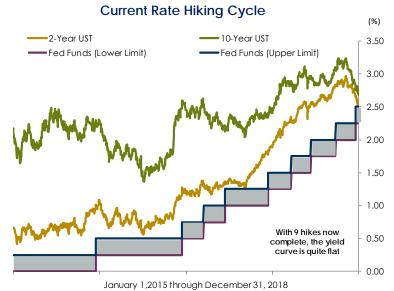

"It was the best of times, it was the worst of times" across the fixed income landscape in 4Q-18. As expected, the **Federal Reserve** increased short-term interest rates in December, to a targeted range of 2.25% to 2.50%. The tone of the **message was slightly more dovish than prior statements**, with the dot-plot now projecting only two more increases by the end of 2019. The rates market became quite skeptical of additional tightening amid market volatility, and **US Treasury yields crashed lower in the final weeks of the year**.

Having spent the entire year well underwater, the **BloomBar Aggregate** became a reliable safe-haven as equity volatility spiked. Full-year results ended at +0.01%, despite being **hindered by ~50 bps of spread widening in IG corporate credits during 4Q-18**. The tug-of-war between rates and spreads caused the benchmark's yield-to-worst to decline to 3.3%.

Coming off fresh 10-year lows, **High Yield** spreads widened by ~210 bps during 4Q-18. Energy-related, and CCC-rated issues were hardest hit by this pullback, which has taken **index-level yields to nearly 8.0%**. Floating-rate bank loans also suffered for the quarter.

Municipal Bonds were solidly positive, but lagged taxable counterparts as rates moved rapidly lower late in the period. The tax-exempt yield curve is notably steeper than that of US Treasuries, providing enhanced yield and better valuations for extended maturities.

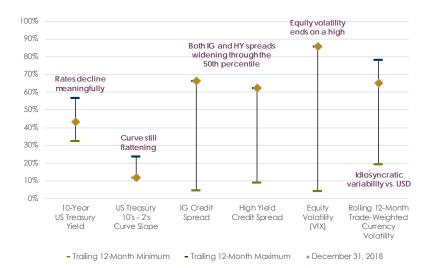

Unhedged Global government bonds outperformed as US dollar strength moderated and yields reacted to global growth concern. **Emerging Market** returns remained quite volatile.

Sources: Bloomberg, ACG Research

Global Nontraditional Fixed Income

Percentile Rankings of Observations for Past 15-Years

Sources: Bloomberg, ACG Research

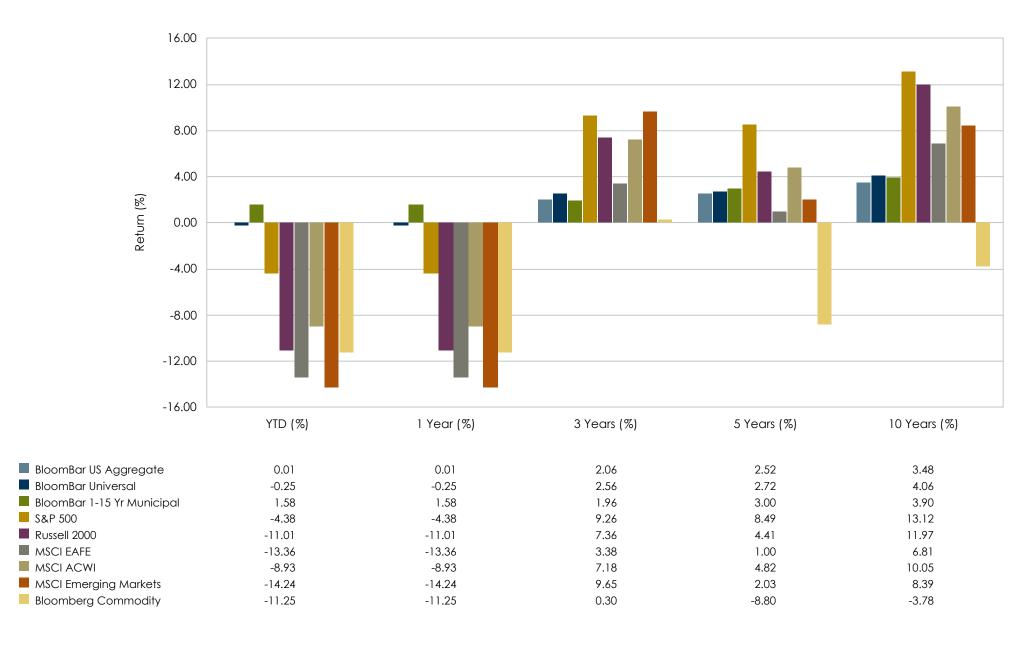

Liquid Absolute Return strategies produced disparate results in 4Q-18, with credit-heavy funds underperforming those now favoring more risk-off duration. Amid the rally in US Treasury yields, nothing in the category kept pace with traditional bond benchmarks. Still, diversification of risk factors within portfolios remains valuable, as this aids in downside protection and reduces key correlations. Achieving full-cycle alpha objectives remains challenging, but enhanced volatility in rates, spreads, and currency should provide opportunities to outperform risk-free cash.

Widening credit spreads provided a 4Q-18 test for credit-focused absolute return managers. Credit hedge funds tend to run with little or no duration exposure and don't reap the benefit of flight-to-quality scenarios. However, they benefit from existing short positions and the potential for new relative value and distressed opportunities. Some began to tactically reduce risk levels prior to the November and December market declines, with others preferring to incrementally increase credit quality and liquidity. We continue to believe that credit hedge funds are situated to provide protection relative to their long-only credit counterparts in a downturn.

Private Credit strategies (typically 5- to 10-year fund life) offer the opportunity to earn both a credit spread and an illiquidity premium versus publicly traded fixed income strategies. 4Q-18 saw a dramatic reversal in market dynamics for new issue levered loans. By December, new issue loan volume fell precipitously, spreads widened, and loan documents were revised to include more creditor protections than had been seen earlier in the year. Although default rates have remained low, these shifts in the market may indicate the beginnings of investor concern around the possibility of a coming distressed cycle. Due to the high-leverage, covenant-lite loans issued over the last several years, recoveries may be worse as companies are allowed to operate longer without previously customary capital preservation requirements.

Portfolio Information

- Minimum initial investment \$50,000
- Minimum subsequent investments \$5,000
- Minimum redemption \$5,000
- The Portfolio is open once a month, on the first business day following the Portfolio Valuation date, to accept Member contributions or redemptions.
- The Portfolio is valued on the last business day of the month.
- The Administrator must have advance written notification of Member contributions or redemptions.

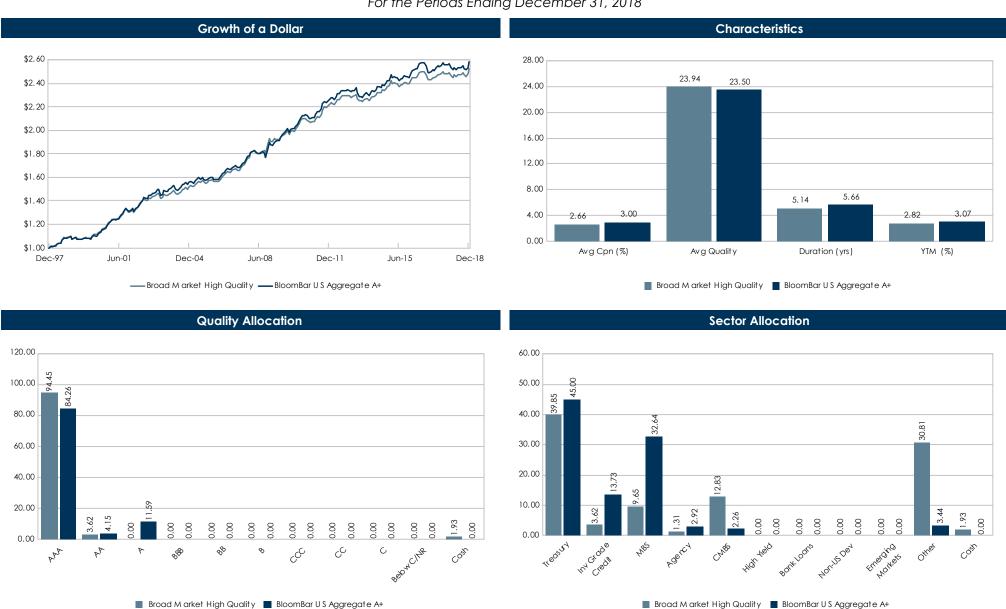

Portfolio Objectives and Constraints

- Invests in Government and high quality securities while maintaining an average maturity of approximately eight and one-half years.
- Outperform the BloomBar US Aggregate A+ over a complete market cycle (usually 3 to 5 years).
- Rank above median in a relevant peer group universe.
- The Portfolio is subject to interest rate, credit and liquidity risk, which may cause a loss of principal. Neither the Fund nor its yield is guaranteed by the US Government.

Portfolio Description

- Strategy International Equity
- Manager Investec Asset Management and Wells Capital Management
- Vehicle Non-Mutual Commingled
- Benchmark MSCI ACWI ex US
- Performance Inception Date June 2005 (Manager changes April 2011, October 2014 & October 2017)
- Fees Manager Fee 43 bps; Admin Fee 14.5 bps
- **Total Expenses** Approximately 62 bps

Portfolio Information

- Minimum initial investment \$50,000
- Minimum subsequent investments \$5,000
- Minimum redemption \$5,000
- The Portfolio is open once a month, on the first business day following the Portfolio Valuation date, to accept Member contributions or redemptions.
- The Portfolio is valued on the last business day of the month.
- The Administrator must have advance written notification of Member contributions or redemptions.

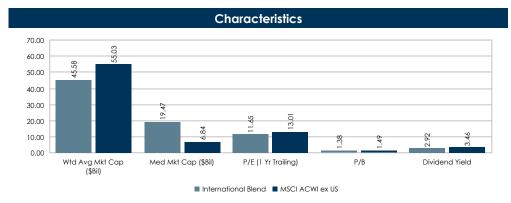

Portfolio Objectives and Constraints

- Invests in developed and emerging markets outside the US. Maintains approximately equal weightings to both growth and value securities through a systematic rebalancing process.
- Outperform the MSCI ACWI ex US over a complete market cycle (usually 3 to 5 years).
- Rank above median in a relevant peer group universe.
- Stock values fluctuate in response to the activities of individual companies, the general market and economic conditions. Investments in foreign securities generally pose greater risk than domestic securities.
