
Florida Municipal Pension Trust Fund – DB 50% Equity Allocation
Executive Summary
As of September 30, 2024

50% Equity Allocation

- The FOMC reduced the Federal Funds target rate by 50 bps to 4.75% - 5.00%, its first cut since 2020. Performance of equity markets over the last quarter has broadened out from the tech-focused US large caps that led in the first half of 2024 as large cap value, small caps, and non-US equities all outperformed the S&P 500 over the last quarter. US treasury yields continued to trend lower with the largest declines on the front end of the curve. The curve steepening reversed the previously inverted 2-year/10-year yield curve for the first time in over two years. Real estate returns were negative once again in the third quarter. However, more sectors turned positive this quarter as all property types except offices produced positive returns. The 50% Equity Allocation slightly trailed the Target Index in the third quarter, rising 5.1% versus up 5.7% for the index.
- Despite the lower allocation to equity, the 50% Equity Allocation has managed to earn an 17.5% return over the past year, and outpaced the performance of the Target Index over the past 3 years (up 3.4% vs. up 3.3%).
- Over the past 10 years, this allocation is up 6.2% on average annually. While this performance is modestly behind objectives, the risk controlled nature of many of the underlying strategies are designed to provide downside protection should the markets continue to moderate or decline.

FMLvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund continued to perform in line with the Bloomberg US Aggregate A+ Index in the third quarter (both up 5.1%). The Fund has continued to benefit from its exposure to the ABS sector and security selection within the MBS sector. The past 5 years, the Fund has achieved over 50 basis points of excess return on average annually relative to the benchmark.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMLvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund earned the highest third quarter return of all fixed income managers in the FMLvT lineup, rising 6.4%. The fund benefited from continuing to hold an overweight to credit, and the lower relative quality of its holdings. Strong security selection within the Industrials, Financials and agency MBS sectors continues to move the Fund forward. While this performance modestly trails the Bloomberg Multiverse in the third quarter (up 7.0%), the fund has outpaced the benchmark by nearly 400 basis points over the past year.
- In the 10 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 2.1% on average annually, ahead of the benchmark (up 0.7%).

FMLvT Diversified Large Cap Equity Portfolio

- The fund is allocated 60% to the SSgA S&P 500 Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity marketplace. The SSgA S&P 500 Fund replaced Intech in the fourth quarter 2023.
- U.S. equities continued to produce strong results in the third quarter with solid earnings and momentum continuing to drive US large cap returns, but volatility has increased as investors are increasingly wary of the elevated valuations for the large cap tech names that have propelled the rally. The underweight to the information technology and consumer discretionary sectors, and thus, being underweight to the Magnificent 7, continues to be biggest driver in the recent underperformance for the Diversified Large Cap Equity Portfolio.
- Despite the near term difficulties, the Diversified Large Cap Equity portfolio has achieved a 14.5% on average annually over the past 5 years.

Florida Municipal Pension Trust Fund – DB 50% Equity Allocation

Executive Summary

As of September 30, 2024

FMLvT Diversified Small to Mid Cap Equity Fund

- The Fed Funds rate cut helped drive SMID cap equities forward, aiding the strategy's 10.5% rise in the 3rd quarter relative to up 8.8% for the SMID Benchmark. Strong stock selection and an overweight to industrials has continued to benefit the Fund over the past year. The Fund has outperformed the benchmark by over 780 basis points on average annually over the past 3 years.
- This strategy has generated very strong results over the past 10 years, rising 14.2% on average annually compared with 9.5% for the benchmark. Furthermore, the fund ranked in the top 4th percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMLvT International Equity Portfolio

- The FMLvT International Equity Portfolio's momentum slowed in the 3rd quarter with the fund rising just 3.7% vs. up 8.1% for the MSCI ACWI ex US – Net benchmark. Stock picking in consumer discretionary was the biggest detractor in the third quarter performance. The fund has matched the performance of the benchmark over the past year (both up 25.4%).
- While lagging on a 3 year basis, the portfolio has outperformed the benchmark over the past 5 years (up 8.1% vs. up 7.6%).
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMLvT Core Real Estate Portfolio

- In early 2023, a \$50 million redemption was submitted in order to rebalance the portfolio with the proceeds scheduled to be paid out over several quarters. This will reduce the total commitment to \$100 million once all the proceeds are received.
- While declining 2.3% over the trailing one year, the FMLvT Core Real Estate portfolio significantly outperformed the benchmark (down 8.0%) with the large allocation to industrial and apartment properties providing the biggest boost. The office sector has continued to drag on performance with corporate work from home policies increasing vacancies.
- The portfolio has outperformed the NFI ODCE Net benchmark over the past 3 years and has achieved nearly 340 basis points of excess return over the benchmark over the past 5 years.
