
Florida Municipal Pension Trust Fund – DB 70% Equity Allocation
Executive Summary
As of June 30, 2019

70% Equity Allocation

- Despite the intra-quarter volatility that the global equity markets faced, they ultimately advanced in the second quarter helping the 70% Equity Allocation to outpace the Target Index (up 4.5% vs up 3.4%). This allocation posted strong results fiscal year to date, outperforming the Target Index by 170 basis points while ranking in the top 6th percentile of the public fund peer group.
- Over the past 5 years, this allocation posted an absolute return of 7.3% while ranking in the top 4th percentile of its peer group of public defined benefits plans.
- Over the past 10 years, this allocation is up 10.2% on average annually. While this performance is modestly behind the index, it ranks in the top 6th percentile of the peer group, with the risk controlled nature of many of the underlying strategies providing downside protection should the markets moderate.

FMLvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund has minimal investment in the strongest performing sector, US Investment Grade Credit. Both the BloomBar US Aggregate A+ benchmark (14.4%) and the peer group of US Core Fixed Income managers (33.9%) have healthy allocations to this sector of the market. Despite its conservative allocation, the Broad Market High Quality Bond Fund (up 2.7%) nearly matched the performance of the benchmark (2.8%) in the second quarter, and has managed to outperform it over the past 3 years (2.1% vs. 1.9%).
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMLvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund trailed the BloomBar Multiverse in the second quarter (up 2.2% vs 3.3%) primarily due to the funds' shorter duration posture. However, over the past year, the fund has outpaced the benchmark by over 80 basis points and ranks in the top 25th percentile of the peer group of Global Unconstrained Fixed Income managers.
- In the 5 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 2.7% on average annually, outperforming the benchmark (up 1.4%) by over 130 basis points.
- The Core Plus Fixed Income Fund was added to the FMLvT lineup in April 2014 to provide broad global fixed income exposure, through equal allocation to two strategies (Amundi Pioneer Multi-Sector Fixed Income Fund and the Franklin Templeton Global Multi-Sector Plus Fund).

Florida Municipal Pension Trust Fund – DB 70% Equity Allocation
Executive Summary
As of June 30, 2019

FMLvT Diversified Large Cap Equity Portfolio

- The Diversified Large Cap Equity Portfolio was created in October 2017. The fund is allocated 60% to the Intech US Broad Enhanced Plus Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity space.
- This strategy continued to achieve strong results, outpacing the Russell 1000 Index by nearly 130 basis points while ranking in the top 18th percentile of the US Large Cap Core Equity peer group in the second quarter of 2019.
- Each of the core, value, and growth managers outperformed their respective benchmarks and ranked in the top quartile of their peer group universes. Exposure to US large cap growth stocks has been extremely additive over the most recent time periods with the Atlanta Capital High Quality Growth Fund posting the strongest 1 year results (up 25.5%) of all equity accounts in the FMLvT lineup.

FMLvT Diversified Small to Mid Cap Equity Fund

- This strategy posted the strongest results in the FMLvT lineup in the second quarter, achieving a 9.0% return, which outpaced the SMID Benchmark by 600 basis points. Over the past 5 years, the fund has outperformed the benchmark by 700 basis points while ranking in the 2nd percentile of its peer group of US Small-Mid Cap Core Equity managers.
- This strategy has generated very strong results over the past 10 years, rising 18.1% on average annually compared with 14.3% for the benchmark. Furthermore, the fund ranked in the top 2nd percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMLvT International Equity Portfolio

- In October 2017, a ten percent allocation to emerging markets (Wells Capital Berkeley Street Emerging Markets Fund) was added to this portfolio.
- The portfolio continued to post strong results, matching the performance of the MSCI ACWI ex US benchmark (both up 3.2%) in the second quarter. With the headwinds that the international equity markets have faced over the past year, this portfolio has protected on the downside, achieving 55 basis points of excess return over the benchmark.
- Over the past 3 years, the portfolio has outperformed the benchmark by 85 basis points while also ranking in the top 33rd percentile of the peer group of international core equity managers.
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMLvT Core Real Estate Portfolio

- This fund was added to the FMLvT lineup in March of 2018 with the objective to provide broad exposure to the core commercial real estate markets.
- In June 2018, the manager (Morgan Stanley Prime Property Fund) called down an additional commitment of \$75 million which increases the total commitment thus far to \$100 million.
- The FMLvT Core Real Estate Portfolio (up 2.1%) outperformed the NFI ODCE Net benchmark (up 0.8%) in the second quarter, and has outpaced the benchmark by 291 basis points over the past year.

Florida Municipal Investment Trust
Protecting Florida Investment Act - Quarterly Disclosure
As of June 30, 2019

This Disclosure is intended to provide information with respect to Chapter 175 and 185 Police and Fire Plan's required disclosure of direct or indirect holdings in any "scrutinized companies" as defined in the FSBA PFIA Quarterly Report for Quarter 2 2019.

It is important to note that individual Police and Fire Plans have no direct interests in any scrutinized companies. Police and Fire Plans hold an interest in the Florida Municipal Pension Trust Fund. It is also important to note that the Florida Municipal Pension Trust Fund has no direct interests in any scrutinized companies as all of its interests are invested in the Florida Municipal Investment Trust.

The Florida Municipal Investment Trust is the only entity that could possibly have direct interests in any scrutinized companies. ACG has reviewed the **Protecting Florida's Investments Act (PFIA) Quarterly Report-July 12, 2019** that is available on the Florida SBA website. In particular we have reviewed the list of companies appearing in **Tables 1 and 3- Scrutinized Companies with Activities in Sudan and Iran**, and compared these lists to securities of companies held directly by the Florida Municipal Investment Trust. As of 6/30/19, the Florida Municipal Investment Trust had no direct interest in securities on the above referenced lists.

ACG also requested that investment managers, who manage commingled funds that are owned by the Florida Municipal Investment Trust, review the **Protecting Florida's Investments Act (PFIA) Quarterly Report-July 12, 2019** and disclose whether the Florida Municipal Investment Trust may hold any scrutinized companies indirectly through investment in their respective commingled funds. The Florida Municipal Pension Trust holds units in the FMLVT International Equity Portfolio. The FMLVT International Equity Portfolio owns units in the Investec International Dynamic Equity Fund and the Wells Fargo Emerging Markets Large-Mid Cap Equity Fund. Both the Investec International Dynamic Equity Fund and the Wells Fargo Emerging Markets Large-Mid Cap Equity Fund hold **CNOOC Ltd**, which represents 1.88 % and 1.29% of their respective portions of the FMLVT International Equity Portfolio. All other managers have confirmed that they do not hold any of these securities.

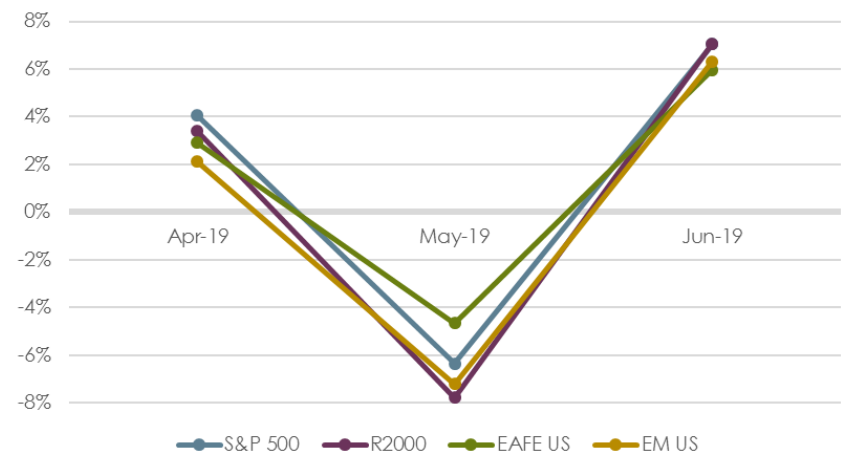

Global Long-Only Equity

Global equity markets ultimately advanced in 2Q-19, but with intra-quarter volatility in the backdrop of positive quarter-end performance. During the period, market advancements in April were erased by the May downdraft as ongoing trade disputes and the potential for expanded tariffs shook markets alongside fears of an impending global economic slowdown. Markets rebounded in June fueled in part by the Federal Reserve signaling no further rate hiking action in 2019, with the potential for policy easing if appropriate.

Domestic Large Caps led the group with a 4.3% gain for the S&P 500 with positive moves in all sectors except Energy. Small Caps posted half the gain, up 2.1% for the Russell 2000 with mixed sector performance. Small Caps posted the sharpest May decline as investors started to fear these companies that tend to have a more domestic footprint may not be as isolated as once thought from trade wars. Global slowdown fears, which have historically pressured higher-beta Small Caps more than Large Cap peers, also detracted.

Developed International markets advanced +4.0% on broad strength throughout the underlying countries, which largely avoided being a target of the Trump Administration's agenda. Meanwhile, Emerging Markets directionally moved in tandem with broader global markets, but posted a somewhat muted +0.7% gain on trade tensions highlighted by the roughly 4.0% decline for China. **The weakened US dollar provided a performance tailwind** of roughly 90 bps and 40 bps for the EAFE and EM indices, respectively.

Positive, but Volatile Equity Markets in 2Q-19

Sources: Bloomberg, ACG Research

Global Long/Short Equity

S&P Index Priced in Units of VIX

Sources: Bloomberg, ACG Research

Volatility (both positive and negative) returned to the market in 2Q-19. The S&P priced in units of volatility (VIX) more than doubled from the end of 2018 through April, then dropped 35% in May and increased 33% in June. We anticipate this **higher volatility to be the norm** for the foreseeable future. All else being equal, an increase in market **volatility helps generate opportunities** on both the long and short side so equity long/short managers stand to benefit.

Equity long/short managers have been optimistic about the outlook for company earnings performance, but seem to be taking a **"wait and see" approach** due to macro concerns surrounding interest rates, trade wars and geopolitical uncertainty around the world. This is reflected by **gross exposure** that is **at average historical levels** with net moving up to slightly above historical averages. The managers remain **ready to deploy capital** if there are any significant dislocations.

Global **positioning has shifted more into the US** as European exposures decreased due to Brexit concerns. Despite this decrease, European exposure remains above historical averages. Asia exposure is mixed as **China Internet exposure hit all-time highs** while Japan exposure is near historic lows. **Health Care**, typically a key sector of interest, has also seen a reversal as net **exposure has decreased** to the lowest level in a year. **Event Driven** exposure has increased from multi-year lows in 1Q-19 as **corporate activity remains healthy** and is expected to increase if there is any clarity on the trade war.

Global Private Equity

Valuations, if the trend thus far holds, will set new highs in 2019 as YTD purchase price multiples have exceeded 11x EBITDA. The median acquisition price for a private equity-backed company purchased in 2Q-19 was 11.3x EBITDA, up from 2018's 10.6x EBITDA mark. Leverage levels have held steady at approximately 5.7x EBITDA, leaving private equity sponsors to make up the difference with larger equity investments. Time will tell if the second quarter's elevated purchase price multiples are an aberration or a continuation of a 10-year trend.

The possibility of slowing economic growth continues to pose risks to private equity-backed companies, while the prospect of Federal Funds rate cuts may offset some effects of a potential downturn. High purchase prices are also likely to translate into lower returns for select vintages. The best managers recognize that high multiples are unlikely to continue indefinitely and that patience and asset selection is key to driving strong investment outcomes in this environment.

While post-IPO performance was not universally positive, 2Q-19 was the biggest second quarter for IPO volume since 2000 as several large venture-backed companies went public, including Uber, Pinterest, Beyond Meat, and a direct listing of Slack. The second half of the year looks to be similarly busy as businesses including WeWork and Peloton have signaled intentions to go public.

Purchase Multiples and Leverage Remain Elevated

Global Real Assets

NCREIF Income Return Spread to Treasuries

Sources: NCREIF, ACG Research

US real estate assets have seen slowing appreciation, though strong economic fundamentals and limited new supply have been supportive of Net Operating Income. The NCREIF Property Index is expected to post its 37th consecutive quarter of positive appreciation in 2Q-19. This is 15 quarters longer than the second longest winning streak since the benchmark's inception in 1978. In 1Q-19, NCREIF annualized income returns (a proxy for cap rates) were flat at 4.4%. As interest rates continued to tighten in the first quarter, the spread between NCREIF income returns and the 10-year US Treasury yield widened by 27 bps to end the quarter at 203 bps, approximately 75 bps tighter than the median spread since 2000.

Industrial assets continue to be the strongest performing asset class, while retail properties are struggling due to shifting consumer preferences for online shopping. Real estate market fundamentals remain relatively solid, with no imminent signs of a dramatic imbalance between supply and demand outside of the long-challenged retail sector. Industrial assets in key markets continue to enjoy above-trend appreciation. Cap rates remain near their all-time lows, and while further cap rate compression is possible, core real estate funds focused on income may outperform those focused on generating appreciation in the intermediate term.

The Bloomberg Commodity Index (BCOM) fell -1.2% in 2Q-19, underperforming the BloomBar US Aggregate Bond Index by 4.3%, the S&P 500 by 5.5%, and the MSCI ACWI by 4.8%. Any signs of rising inflation may be positive for commodities broadly, though growing concerns regarding slowing global economic growth, the strength of the US dollar, and trade tensions may drive continued volatility in the near term.

Global Traditional Bond Markets

Building anticipation around monetary policy easing supported lower-quality credit, and prolonged the rally in risk-free rates throughout 2Q-19. While not yet taking action on short-term interest rates, the **Federal Reserve's** stated intent to "act as appropriate to sustain the expansion" supports the market view that insurance cut(s) are coming. The futures market is pricing in a remarkable 100% probability of a rate cut in July and at least three cuts over the next 12-months. **US Treasury yields broke below 2%, and the yield curve steepened.**

Given its high sensitivity to domestic interest rates, the **BloomBar US Aggregate** continued to rally. Total returns for the quarter were impressive at 3.1%, with modest spread tightening in IG corporate credit also aiding results. The benchmark's yield-to-worst contracted by nearly 45 bps during the period, settling back below 2.5% for the first time since mid-2017.

Despite a brief interruption in investor risk appetite in May, the **High Yield** bond category maintained its strong performance in 2Q-19. Spreads tightened by ~15 bps at the index level, but the focus on liquidity led to the ongoing underperformance of CCC-rated issues.

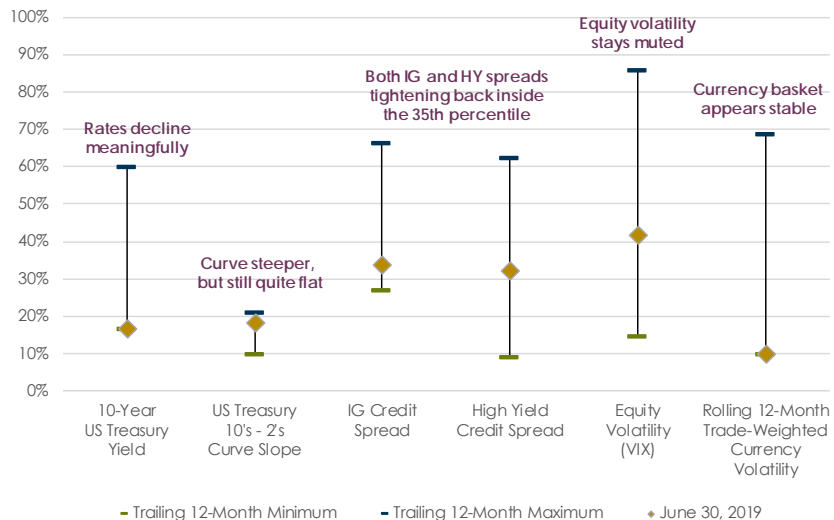

Municipal Bonds performed well, despite lagging taxable counterparts as US Treasury rates moved rapidly lower. Robust demand for income caused the tax-exempt yield curve to flatten modestly, but 10-year yield ratios of ~81% have improved from historically rich levels.

Unhedged Global government bonds outperformed with the combined benefit of lower-trending yields and a slightly weaker US Dollar. **Emerging Markets** were especially strong.

Global Nontraditional Fixed Income

Percentile Rankings of Observations for Past 15-Years

Liquid Absolute Return strategies produced respectable results in 2Q-19, with the willingness to tactically assume modest portfolio duration alongside diversified credit exposures defining outperformers. That said, the strong rally in US Treasuries prevented the category from keeping pace with traditional bond benchmarks. We continue to believe the **diversification of risk factors within portfolios remains valuable**, as this aids in downside protection and reduces key correlations. Achieving full-cycle alpha objectives remains a challenge, but **enhanced volatility in rates, spreads, and currency should provide opportunities** to outperform risk-free cash.

After trailing in the swift 1Q-19 rebound rally, **Long/Short Credit** strategies produced attractive relative results in April and May. Managers largely kept up with US high yield in April and provided meaningful downside protection in May. While most believe we are late in the market cycle, there is divergence in managers' willingness to get defensive in their portfolios. Many have positioned their books with a measure of caution, though some have gone further in expressing decidedly negative views. Broadly, we expect investors will see the most value-add from idiosyncratic relative value situations rather than big beta plays at this point.

Private Credit strategies (typically 5- to 10-year fund life) offer the opportunity to earn both a credit spread and an illiquidity premium versus publicly traded fixed income strategies. **2Q-19 saw continued demand for new issue levered loans** as spreads tightened and volume increased in response to improved equity market conditions. Deal terms and pricing will need to be closely monitored going forward. **Although default rates have remained low, the ongoing volatility in the market may indicate the beginnings of investor concern around the possibility of a coming distressed cycle.** Due to the high-leverage, covenant-lite loans issued over the last several years, recoveries may be worse as companies are allowed to operate longer without previously customary capital preservation requirements.
