**Florida Municipal Pension Trust Fund – OPEB 50% Equity Allocation**  
**Executive Summary**  
*As of March 31, 2024*

**OPEB 50% Equity Allocation**

- The US Fed continued to hold its benchmark rate steady with the forward guidance showing expectations for three rate cuts this year, despite inflation proving stickier than hoped for so far in 2024. Equity markets continued a strong start to the year with all major indices positive for the quarter and the S&P 500 ending on a five month winning streak. Credit spreads continued to tighten amid strong economic data, but the economic backdrop remains supportive of credit and all-in yields are attractive relative to recent history. Real estate returns could continue to be challenged amid higher interest rates, tighter lending conditions, and reduced demand for office space. The 50% Equity Allocation achieved a strong absolute return in the first quarter, up 3.7%, ahead of the Target Index, up 3.3%.
- Despite the lower allocation to equity, the 50% Equity Allocation has managed to earn an 10.3% average annual return over the past year, ahead of the performance of the Target Index (up 10.1%).
- Over the past 10 years, this allocation is up 5.9% on average annually. While this performance is modestly behind objectives, the risk controlled nature of many of the underlying strategies are designed to provide downside protection should the markets continue to moderate or decline.

**FMIvT Broad Market High Quality Bond Fund**

- The Broad Market High Quality Bond Fund modestly outperformed the Bloomberg US Aggregate A+ Index in the first quarter (down 0.7% vs. down 0.9%). The Fund's underweight to corporate credit posed a headwind in the first quarter, but it benefited from security selection within the ABS and MBS sectors. Over the past 5 years, the Fund has achieved over 10 basis points of excess return on average annually relative to the benchmark.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

**FMIvT Core Plus Fixed Income Fund**

- The Core Plus Fixed Income Fund outpaced the Bloomberg Multiverse index by nearly 230 basis points in the first quarter, rising 0.3% vs down 1.9% for the benchmark. The fund benefited from continuing to hold an overweight to credit, and the lower relative quality of its holdings. However, with the US recession risk still in play as we move forward in 2024 the Fund has been stepping up in quality bias, favoring securitized over corporates and within corporates, financials over industrials. Over the last 3 years, the fund has outpaced the benchmark by 370 basis points.
- In the 10 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 1.0% on average annually, ahead of the benchmark (up 0.1%).

**FMIvT Diversified Large Cap Equity Portfolio**

- The fund is allocated 60% to the SSgA S&P 500 Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity marketplace. The SSgA S&P 500 Fund replaced Intech in the fourth quarter 2023.
- U.S. equities continued to produce strong results in the first quarter with falling inflation and the expectation of central bank policy easing providing a favorable backdrop for equities. The underweight to the information technology and consumer discretionary sectors, and thus, being underweight to the Magnificent 7, was the biggest driver in the 1<sup>st</sup> quarter underperformance for the Diversified Large Cap Equity Portfolio (up 9.2% vs. up 10.3%).
- Despite the near term difficulties, the Diversified Large Cap Equity portfolio has achieved a 13.5% return on average annually over the past 5 years.

---

**Florida Municipal Pension Trust Fund – OPEB 50% Equity Allocation**  
**Executive Summary**  
*As of March 31, 2024*

**FMIvT Diversified Small to Mid Cap Equity Fund**

- This strategy rebounded from the difficulties in the fourth quarter and achieved a 9.5% return in the first quarter, outperforming the SMID benchmark by nearly 260 basis points. Strong stock selection and an overweight to industrials and consumer discretionary has benefited the Fund over the past year. The Fund has outperformed the benchmark by over 610 basis points on average annually over the past 3 years.
- This strategy has generated very strong results over the past 10 years, rising 12.7% on average annually compared with 8.8% for the benchmark. Furthermore, the fund ranked in the top 2<sup>nd</sup> percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

**FMIvT International Equity Portfolio**

- The FMIvT International Equity Portfolio continued to produce strong results in the first quarter, outpacing the MSCI ACWI ex US - Net benchmark by nearly 60 basis points and ranking in the top 49<sup>th</sup> percentile of its peer group of international equity managers. Strong stock selection in the healthcare and consumer staples sectors, coupled with an underweight to China, provided a boost to the portfolio in the first quarter.
- Despite some of the struggles over the past 3 years, the portfolio has outperformed the benchmark over the past 5 years (up 6.1% vs. up 6.0%).
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

**FMIvT Core Real Estate Portfolio**

- In early 2023, a \$50 million redemption was submitted in order to rebalance the portfolio with the proceeds scheduled to be paid out over several quarters. This will reduce the total commitment to \$100 million once all the proceeds are received.
- While declining 6.1% over the trailing one year, the FMIvT Core Real Estate portfolio significantly outperformed the benchmark (down 12.0%) with the large allocation to industrial and apartment properties providing the biggest boost. The office sector has continued to drag on performance with corporate work from home policies increasing vacancies.
- The portfolio has outperformed the NFI ODCE Net benchmark over the past 3 years and has achieved over 210 basis points of excess return over the benchmark over the past 5 years.
