## Florida Municipal Pension Trust Fund – OPEB 50% Equity Allocation

### Executive Summary

As of March 31, 2025

#### **OPEB 50% Equity Allocation**

- The US Fed held its benchmark rate steady at a range of 4.25% - 4.50% and maintained forward guidance for two more cuts in 2025. Trade war news was the focus for investors in the first quarters as increased volatility hit the markets. Equity performance was mixed in March, with US equities sharply lower as the S&P 500 hovered near correction territory. Non-US equity markets continued their YTD outperformance as a weaker dollar provided a tailwind. US Treasury yields ended the month mixed with a steeper curve as the market digested inflation results, growth concerns, and tariff uncertainty. Core real estate returns maintained momentum with a 3<sup>rd</sup> consecutive quarter of positive returns. All property sectors gained in the quarter as even the much-maligned office sector produced a positive return. The 50% Equity Allocation outperformed the Target Index in the first quarter, up 1.3% versus up 0.4% and ranked in the top 5<sup>th</sup> percentile of its universe of public DB plans.
- Despite the lower allocation to equity, the 50% Equity Allocation has managed to earn an 5.2% return over the past year, and outpaced the performance of the Target Index over the past 5 years (up 8.3% vs. up 7.7%).
- Over the past 10 years, this allocation is up 5.7% on average annually. While this performance is modestly behind objectives, the risk controlled nature of many of the underlying strategies are designed to provide downside protection should the markets continue to moderate or decline.

#### **FMLvT Broad Market High Quality Bond Fund**

- The Broad Market High Quality Bond Fund outpaced the Bloomberg US Aggregate A+ Index in the first quarter (up 3.1% vs up 2.9%), and ranked in the top 8<sup>th</sup> percentile of its peer group of US core fixed income managers. The Fund has continued to benefit from its exposure to the ABS sector and security selection within the MBS sector. Over the past 3 years, the Fund has achieved over 70 basis points of excess return on average annually relative to the benchmark.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

#### **FMLvT Core Plus Fixed Income Fund**

- The Core Plus Fixed Income Fund once again outpaced the Bloomberg Multiverse in the first quarter, up 3.3% vs. up 2.6%. The fund benefited from continuing to hold an overweight to MBS and CMBS, and an overweight to the belly of the yield curve, notably the 5-year portion. Strong security selection within the Financials and agency MBS sectors continues to move the Fund forward. The fund has outpaced the benchmark by over 460 basis points over the past year and ranks in the top 28<sup>th</sup> percentile of its peer group of global unconstrained fixed income managers.
- In the 10 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 2.2% on average annually, ahead of the benchmark (up 0.8%).

#### **FMLvT Diversified Large Cap Equity Portfolio**

- The fund is allocated 60% to the SSgA S&P 500 Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity marketplace. The SSgA S&P 500 Fund replaced Intech in the fourth quarter 2023.
- U.S. equities ended the first quarter sharply lower as the S&P 500 hovered near correction territory. Trade uncertainty weighed on the market and has led to a sharp decline in overall sentiment. The underweight to the information technology and consumer discretionary sectors, and thus, being underweight to the Magnificent 7, finally turned in the first quarter and helped the Diversified Large Cap Equity Portfolio outperform the Russell 1000 by over 231 basis points and rank in the top 30<sup>th</sup> percentile of its peer group of large cap core equity managers.
- The Diversified Large Cap Equity portfolio has achieved an 18.4% return on average annually over the past 5 years.

---

## Florida Municipal Pension Trust Fund – OPEB 50% Equity Allocation

### **Executive Summary**

*As of March 31, 2025*

#### **FMIvT Diversified Small to Mid Cap Equity Fund**

- SMID cap stocks were lower as trade war fears hit the asset class in the first quarter. SMID cap earnings growth has been roughly flat over the last 3 years, and the Fund needs to see the high quality companies held deliver on earnings growth. Despite the difficulties facing the asset class, the Fund outpaced the benchmark by over 310 basis points in the first quarter and by nearly 520 basis points over the past 3 years.
- This strategy has generated very strong results over the past 10 years, rising 11.9% on average annually compared with 7.5% for the benchmark. Furthermore, the fund ranked in the top 4<sup>th</sup> percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

#### **FMIvT International Equity Portfolio**

- The FMIvT International Equity Portfolio's momentum continued in the first quarter with the fund rising 6.1% vs. up 5.2% for the MSCI ACWI ex US – Net benchmark. Non-US equity markets outperformed their US counterparts as a weaker dollar provided a tailwind. Stock picking in industrials and IT, as well as in China and India, drove performance the most in the first quarter. The fund has outpaced the benchmark by nearly 190 basis points over the past year (up 8.0% vs. up 6.1%). The portfolio has outperformed the benchmark over all longer term time periods.
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

#### **FMIvT Core Real Estate Portfolio**

- In early 2023, a \$50 million redemption was submitted in order to rebalance the portfolio with the proceeds scheduled to be paid out over several quarters. This will reduce the total commitment to \$100 million once all the proceeds are received.
- Core real estate returns maintained momentum with a third consecutive quarter of positive returns. All property sectors gained in the quarter as even the much-maligned office sector produced a positive return. While rising 2.9% over the trailing one year, the FMIVT Core Real Estate portfolio significantly outperformed the benchmark (up 1.2%). Trade policy uncertainty could slow the commercial real estate market as companies potentially put investment and leasing decisions on hold. Potentially higher construction costs raise risks for new developments, but the supply constraint would support valuations on existing properties.
- The portfolio has outperformed the NFI ODCE Net benchmark over the past 5 years and has achieved nearly 300 basis points of excess return over the benchmark over the past 7 years.
