Introduction

This report presents the results of the October 1, 2018 actuarial valuation of the City of Palm Beach Gardens General Employees' Pension Plan. The report is based on the participant data and asset information provided by the pension plan administrator and, except for a cursory review for reasonableness including a comparison to the data provided for the previous valuation, we have not attempted to verify the accuracy of this information.

The primary purpose of this report is to provide a summary of the funded status of the plan as of October 1, 2018 and to determine the minimum required contribution under Chapter 112, Florida Statutes, for the 2019/20 plan year. In addition, this report provides a projection of the long-term funding requirements of the plan, statistical information concerning the assets held in the trust, statistical information concerning the participant population, and a summary of any recent plan changes.

The liabilities and cost presented in this report are based on numerous assumptions concerning the cost of benefits to be provided in the future, long-term investment returns, and the future demographic experience of the current participants. Anyone referring to this report should remember that the cost developed herein is only an *estimate* of the true cost of providing post-employment pension benefits. No one can predict with certainty whether the true cost will be higher or lower than the cost presented in this report. The calculated cost is entirely dependent upon the assumptions that are described in Table IV-A. If any of the assumptions is changed, then the cost shown in this report will change accordingly. Likewise, if any of the assumptions is not completely realized, then the cost shown in this report will change in the future.

Certain assumptions play a bigger role than others in determining the cost of the post-employment pension benefits. In some cases, relatively small changes in a particular assumption can have a dramatic impact on the anticipated cost of benefits. Although a thorough analysis of the impact of such changes is beyond the scope of this report, Table I-B illustrates the impact that alternative long-term investment returns would have on the normal cost rate.

Minimum Required Contribution

Table I-A shows the development of the minimum required contribution for the 2019/20 plan year. The minimum required contribution is \$114,994, which equates to 102.52% of covered payroll. The minimum required contribution decreased by \$89,531 from the prior valuation.

The normal cost rate is 113.13%, which is 1.63% lower than the rate that was developed in the prior valuation. Table I-C provides a breakdown of the sources of change in the normal cost rate. Significantly, the rate decreased by 0.56% of payroll due to investment gains and decreased by another 1.07% of payroll due to demographic experience. Although the market value of assets earned 7.63% during the 2017/18 plan year, the actuarial value of assets is based on a four-year phase-in of the net investment appreciation. On this basis, the actuarial value of assets only earned

7.29% during the 2017/18 plan year, whereas a 7.00% annual investment return was required to maintain a stable contribution rate.

Chapter 112, Florida Statutes, sets forth the rules concerning the minimum required contribution for public pension plans within the state. Essentially, the City must contribute an amount equal to the annual normal cost of the plan plus an adjustment as necessary to reflect interest on any delayed payment of the contribution beyond the valuation date. On this basis, the City's 2019/20 minimum required contribution will be equal to \$114,994.

Based on the current assets, participant data, and actuarial assumptions and methods that are used to value the plan, the present-day value of the total long-term funding requirement is \$4,040,308. As illustrated in Table I-A, current assets are sufficient to cover \$2,610,323 of this amount, the employer's 2018/19 expected contribution will cover \$204,525 of this amount, the employer's 2019/20 expected contribution will cover \$114,994 of this amount, and future employee contributions are expected to cover \$72,021 of this amount, leaving \$1,038,445 to be covered by future employer funding beyond the 2019/20 plan year. Again, demographic and investment experience that differs from that assumed will either increase or decrease the future employer funding requirement.

Advance Employer Contribution

The City has made contributions to the plan in excess of the minimum amount that was required to be contributed pursuant to Chapter 112. In this report, the excess contributions are referred to as an "advance employer contribution." As of October 1, 2018, the advance employer contribution is \$19,992, which is equal to the prior year advance contribution of \$97,854 minus \$77,862 to cover the shortfall between actual City contributions and the minimum required contribution for the 2017/18 fiscal year, as shown in Table II-F.

The City may apply all or any portion of the advance employer contribution towards the minimum required contribution for the 2018/19 plan year or for any later plan year. The minimum required contribution for that plan year will be reduced dollar-for-dollar by the amount of the advance employer contribution that is applied in this manner.

Alternatively, at any time, the City may apply all or any portion of the advance employer contribution as an *extra* contribution in excess of the minimum required contribution. In this case, the immediate application of the entire balance of the advance employer contribution as of October 1, 2018 would reduce the normal cost rate to 111.47% of payroll and would reduce the minimum required contribution for the 2019/20 plan year to \$113,090.

Contents of the Report

Tables I-D through I-G provide a detailed breakdown of various liability amounts by type of benefit and by participant group. Tables II-A through II-F provide information concerning the assets of the trust fund. Specifically, Table II-A shows the development of the actuarial value of assets, which is based on a four-year phase-in of the net investment appreciation in order to provide a more stable and predictable contribution rate for the employer. Tables III-A through III-G provide statistical information concerning the plan's participant population. In particular, Table III-G gives a 10-year projection of the cash that is expected to be required from the trust fund in order to pay benefits to the current

group of participants. Finally, Tables IV-A through V-B provide a summary of the actuarial assumptions and methods that are used to value the plan's benefits and of the relevant plan provisions as of October 1, 2018, as well as a summary of the changes that have occurred since the previous valuation report was prepared.

Accumulated Employee Contributions

Note that an employee contribution history was only available since September 30, 2004. Therefore, this report does not show the balance of accumulated employee contributions.

Certification

This actuarial valuation was prepared by me or under my direct supervision and I acknowledge responsibility for the results. To the best of my knowledge, the results are complete and accurate and, in my opinion, the techniques and assumptions used are reasonable and meet the requirements and intent of Chapter 112, Florida Statutes. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material change in plan costs or required contribution rates have been taken into account in the valuation.

 For the period October 1, 2025 through September 30, 2026 \$270,925
 For the period October 1, 2026 through September 30, 2027 \$262,095
 For the period October 1, 2027 through September 30, 2028 \$253,213

Summary of Actuarial Methods and Assumptions

Table IV-A

NOTE: The following assumptions and methods have been selected and approved by the Board of Trustees based in part on the advice of the plan's enrolled actuary in accordance with the authority granted to the Board under the pension ordinances and State law.

1. **Actuarial Cost Method**

Aggregate cost method. Under this actuarial cost method, a funding cost is developed for the plan as a level percentage of payroll. The level funding percentage is calculated as the excess of the total future benefit liability over accumulated assets and future employee contributions, with this excess spread over the expected future payroll for current active participants. The normal cost is equal to the level funding percentage multiplied by the expected payroll for the year immediately following the valuation date. The actuarial accrued liability is equal to the accumulated assets. Therefore, under the aggregate cost method, no unfunded accrued liability is developed.

2. **Asset Method**

The actuarial value of assets is equal to the market value of assets, adjusted to reflect a four-year phase-in of the net investment appreciation.

3. **Interest (or Discount) Rate**

7.00% per annum

4. **Salary Increases**

Plan compensation is assumed to increase at the rate of 5.00% per annum, unless actual plan compensation is known for a prior plan year. In addition, the otherwise determined plan compensation during the final year of employment has been loaded by 20% to account for non-regular compensation.

5. **Decrements**

- Pre-retirement mortality: Sex-distinct rates set forth in the RP-2000 Combined Mortality Table, with full generational improvements in mortality using Scale BB
- Post-retirement mortality: Sex-distinct rates set forth in the RP-2000 Combined Mortality Table, with full generational improvements in mortality using Scale BB
- Disability: None is assumed.
- Termination: None is assumed.
- Retirement: Retirement is assumed to occur at normal retirement age.

Summary of Actuarial Methods and Assumptions

Table IV-A

(continued)

6. Form of Payment

Future retirees have been assumed to select the 10-year certain and life annuity.

7. Expenses

The total projected benefit liability has been loaded by 4.00% to account for anticipated administrative expenses. In addition, the interest rate set forth in item 3. above is assumed to be net of investment expenses and commissions.

Changes in Actuarial Methods and Assumptions

Table IV-B

No assumptions or methods were changed since the completion of the previous valuation.

The following additional assumption and method changes were made during the past 10 years:

- (1) *Effective October 1, 2017, the interest (or discount) rate was decreased from 7.25% per annum to 7.00% per annum.*
- (2) *Effective October 1, 2016, the mortality basis was changed from a 2015 projection of the RP-2000 Mortality Table for annuitants to a full generational projection using Scale BB of the RP-2000 Combined Mortality Table as required by State law.*
- (3) *Effective October 1, 2014, the assumed retirement age was changed from the most valuable retirement age to the normal retirement age.*

Summary of Plan Provisions

Table V-A

1. **Benefit Formula**

2.50% of average monthly earnings multiplied by credited service

2. **Service Retirement**

Normal retirement: Age 62

Early retirement: Age 55 with at least 10 years of credited service

Note: In the case of early retirement, the participant's benefit is reduced by $1/180$ for each of the first 60 months and by $1/360$ for each of the next 24 months by which the participant's early retirement age precedes his normal retirement age.

3. **Disability Retirement**

Participant must become totally and permanently disabled prior to his termination of employment as determined by the pension board.

The disability benefit is a monthly 10-year certain and life annuity equal to the participant's monthly accrued benefit, but offset as necessary to preclude the total of the participant's worker's compensation, 50% of the participant's social security disability benefit, and any other City-provided disability compensation from exceeding his final monthly salary excluding overtime. For this purpose, the amount of any lump sum worker's compensation payment is converted to an equivalent monthly benefit payable for 10 years certain by dividing the lump sum amount by 83.9692.

A disabled participant may elect the single life annuity or a joint and contingent annuity in lieu of the 10-year certain and life form of payment. Regardless of the form of payment, benefits cease upon the participant's recovery from his disability prior to his normal retirement date.

4. **Deferred Vested Retirement**

A vested participant who terminates employment before becoming eligible for retirement receives a deferred vested retirement benefit equal to the vested portion of his accrued monthly benefit payable at the participant's early or normal retirement age. If the benefit is payable prior to normal retirement age, then the benefit is reduced by $1/15$ for each of the first 60 months and by $1/30$ for each of the next 24 months by which the participant's early retirement age precedes his normal retirement age.

A non-vested participant who terminates employment receives his accumulated contributions.

Summary of Plan Provisions

Table V-A

(continued)

5. Vesting

A participant becomes 100% vested upon the attainment of 10 years of credited service. Alternatively, a participant becomes partially vested upon the attainment of five years of credited service in accordance with the following table:

<u>Years of Credited Service</u>	<u>Vested Percentage</u>
Less than five	0%
At least five, but less than six	25%
At least six, but less than seven	40%
At least seven, but less than eight	55%
At least eight, but less than nine	70%
At least nine, but less than 10	85%
At least 10	100%

6. Pre-Retirement Death Benefit

If a vested participant dies prior to retirement, the participant's beneficiary receives a 10-year certain annuity equal to the participant's monthly accrued benefit, payable beginning at the participant's early or normal retirement age. Alternatively, the beneficiary may elect to receive an actuarially equivalent immediate 10-year certain annuity or any one of the optional forms of payment that would otherwise be available to the participant. The pension board may elect to pay the pre-retirement death benefit as a single lump sum if the monthly benefit is less than \$100.00 or the lump sum value is \$5,000.00 or less.

If a non-vested participant dies prior to retirement, the participant's beneficiary receives the participant's accumulated contributions.

7. Form of Payment

Actuarially increased single life annuity (*optional*);

10-year certain and life annuity (*normal form of payment*);

Actuarially reduced 50% joint and contingent annuity (*optional*);

Actuarially reduced 66⅔% joint and contingent annuity (*optional*);

Actuarially reduced 75% joint and contingent annuity (*optional*);

Summary of Plan Provisions

Table V-A

(continued)

Actuarially reduced 100% joint and contingent annuity *(optional)*;

Actuarially adjusted social security level-income annuity *(optional)*; or

Actuarially equivalent single lump sum distribution *(only available at the discretion of the pension board if the single sum value of the participant's benefit is less than or equal to \$5,000.00 or the monthly annuity is less than \$100.00)*

(Note: All forms of payment guarantee at least the return of the participant's accumulated contributions. Furthermore, a participant may change his joint annuitant up to two times after retirement subject to an actuarially equivalent adjustment provided that the participant and his previous joint annuitant were married at the time of retirement and were subsequently divorced and if the previous joint annuitant is still living at the time of the change.)

8. Average Monthly Earnings

Average monthly earnings during the highest three consecutive years out of the last five years of compensation immediately preceding the determination or career average earnings if higher. Earnings include total cash remuneration for services rendered. Earnings cannot exceed the maximum amount allowed under IRC section 401(a)(17).

9. Credited Service

The elapsed time from the participant's date of hire until his date of termination, retirement, or death. For purposes of calculating the amount of a participant's benefit, credited service excludes periods during which the participant does not make the required employee contribution.

10. Employee Contribution

Employees must contribute 6.00% of earnings. Employee contributions (other than those employee contributions which are used to purchase credited service) are accumulated with interest at the rate of 6.00% per annum.

11. City Contribution

The City is required to make periodic contributions at least on a quarterly basis as determined under Chapter 112, Florida Statutes.

Summary of Plan Provisions

Table V-A

(continued)

12. Participant Requirement

All regular full-time general employees of the City of Palm Beach Gardens who were hired prior to February 7, 1997 became a participant in the plan as of their date of hire. No employees hired after February 6, 1997 are eligible to participate.

13. Actuarial Equivalence

Based on 8.00% interest per annum and the 1983 Group Annuity Mortality Table, blended 50%/50% for males and females

14. Plan Effective Date

The plan was originally effective on December 20, 1982.

Summary of Plan Amendments

Table V-B

No significant plan amendments were adopted since the completion of the previous valuation.
