
Florida Municipal Pension Trust Fund – DB 60% Equity Allocation
Executive Summary
As of September 30, 2020

60% Equity Allocation

- Despite a weaker September, global equity returns were positive as a broad appetite for risk remained through most of third quarter. Growth stocks have continued to lead the Value peers that tend to be more cyclical. Large caps have been able to overcome the first quarter challenges and are in positive territory YTD, but Small Caps have not been as fortunate. The 60% Equity Allocation managed to outperform the Target Index (up 5.8% vs. up 4.9%), and rank in the top 25th percentile in the public fund peer group in the third quarter.
- While this allocation has been unable to keep up with the Target Index over the past 5 years, it has moderately outperformed the public fund peer group (up 8.2% vs. up 8.1%).
- Over the past 10 years, this allocation is up 7.9% on average annually. While this performance is slightly behind the target index, it ranks in the top 42nd percentile of the peer group with the risk-controlled nature of many of the underlying strategies providing downside protection should the markets moderate.

FMLvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund bounced back in the third quarter, and was able to outpace the BloomBar US Aggregate A+ Index (up 0.6% vs. up 0.4%). Despite the difficult results relative to the peer group of US Core Fixed Income managers over the past year, this fund has achieved over 60 basis points of excess return over the benchmark during this time period.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMLvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund posted strong absolute returns in the third quarter, rising 2.0%, but was unable to keep pace with the BloomBar Multiverse Index (up 2.7%).
- Despite the difficult results year to date, in the 5 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 3.6% on average annually, modestly trailing the benchmark (up 4.1%).
- The Core Plus Fixed Income Fund was added to the FMLvT lineup in April 2014 to provide broad global fixed income exposure, through equal allocation to two strategies (Amundi Pioneer Multi-Sector Fixed Income Fund and the Franklin Templeton Global Multi-Sector Plus Fund).

Florida Municipal Pension Trust Fund – DB 60% Equity Allocation
Executive Summary
As of September 30, 2020

FMIvT Diversified Large Cap Equity Portfolio

- The Diversified Large Cap Equity Portfolio was created in October 2017. The fund is allocated 60% to the Intech US Broad Equity Plus Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity marketplace.
- Despite the weakness in September, global equity returns were positive as a broad appetite for risk remained through most of third quarter. Growth stocks have continued to lead the Value peers that tend to be more cyclical. This strategy reaped the benefits of the increased market optimism, rising 9.7% in the third quarter, outpacing the Russell 1000 benchmark by nearly 30 basis points and ranking in the top 26th percentile of its US large cap core equity peer group universe. The strategy was able to overcome the first quarter challenges and is in positive territory for the year.
- Despite the headwinds posed by the US large cap value stocks over more recent time periods, exposure to US large cap growth stocks has been extremely additive with the Atlanta Capital High Quality Growth Fund rising 21.9% over the past 3 years.

FMIvT Diversified Small to Mid Cap Equity Fund

- This strategy faced some headwinds in the third quarter, and was unable to keep up with the SMID Benchmark (up 3.4% vs up 5.9%). Over the past 5 years, the fund has achieved an average annual return of 13.1%, ranking in the top 13th percentile of its peer group of US small-mid cap core equity managers.
- This strategy has generated very strong results over the past 10 years, rising 14.8% on average annually compared with 10.8% for the benchmark. Furthermore, the fund ranked in the top 4th percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMIvT International Equity Portfolio

- In October 2017, a ten percent allocation to emerging markets (Wells Capital Berkeley Street Emerging Markets Fund) was added to this portfolio.
- This portfolio continued its rebound from the first quarter struggles, rising 11.0% in the third quarter and achieving the highest return of all strategies in the FMIvT lineup. This fund has outpaced the MSCI ASWI ex US benchmark by over 1,000 basis points and ranked in the top 27th percentile of its peer group of international core managers over the past year.
- Strong stock selection in the financials and technology sector led to the strong performance of this strategy in the third quarter. Over the past 5 years, this strategy has been able to outpace the benchmark by over 80 basis points on average annually.
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMIvT Core Real Estate Portfolio

- This fund was added to the FMIvT lineup in March of 2018 with the objective to provide broad exposure to the core commercial real estate markets.
- In June 2018, the manager (Morgan Stanley Prime Property Fund) called down an additional commitment of \$75 million which increases the total commitment thus far to \$100 million.
- The FMIvT Core Real Estate Portfolio (up 1.3%) outpaced the NFI ODCE Net (up 0.3%) benchmark in the third quarter, and has achieved over 240 basis points of excess return over the benchmark over the past 2 years.

Total Portfolio Historical Manager Allocation

January 1998: Initial allocation to Broad Market HQ Bond and HQ Growth Equity only.

January 2000: Added exposure to Small Cap markets and passive Large Cap.

February 2004: Increased equity portfolio exposure through reduction in the Broad Market HQ Bond Fund.

May 2005: Added International exposure; increased the Large Core allocation to reduce the Fund's growth bias.

November 2006: Added Large Cap Value allocation to balance the style exposure.

April 2014: Added Core Plus Fixed Income.

October 2017: FMlvt Diversified Large Cap Equity Portfolio was created, which combines the large cap core, value, and growth portfolios.

March 2018: Added Core Real Estate Portfolio.

Florida Municipal Investment Trust
Protecting Florida Investment Act - Quarterly Disclosure
As of September 30, 2020

This Disclosure is intended to provide information with respect to Chapter 175 and 185 Police and Fire Plan's required disclosure of direct or indirect holdings in any "scrutinized companies" as defined in the FSBA PFIA Quarterly Report for Quarter 3 2020.

It is important to note that individual Police and Fire Plans have no direct interests in any scrutinized companies. Police and Fire Plans hold an interest in the Florida Municipal Pension Trust Fund. It is also important to note that the Florida Municipal Pension Trust Fund has no direct interests in any scrutinized companies as all of its interests are invested in the Florida Municipal Investment Trust.

The Florida Municipal Investment Trust is the only entity that could possibly have direct interests in any scrutinized companies. ACG has reviewed the **Protecting Florida's Investments Act (PFIA) Quarterly Report- September 22, 2020** that is available on the Florida SBA website. In particular we have reviewed the list of companies appearing in **Tables 1 and 3- Scrutinized Companies with Activities in Sudan and Iran**, and compared these lists to securities of companies held directly by the Florida Municipal Investment Trust. As of 9/30/2020, the Florida Municipal Investment Trust had no direct interest in securities on the above referenced lists.

ACG also requested that investment managers, who manage commingled funds that are owned by the Florida Municipal Investment Trust, review the **Protecting Florida's Investments Act (PFIA) Quarterly Report- September 22, 2020** and disclose whether the Florida Municipal Investment Trust may hold any scrutinized companies indirectly through investment in their respective commingled funds. The FMIvT International Equity Portfolio owns units in the Wells Fargo Emerging Markets Large-Mid Cap Equity Fund. The Wells Fargo Emerging Markets Large-Mid Cap Equity Fund holds **CNOOC Ltd**, which represents 0.77% of their respective portion of the FMIvT International Equity Portfolio. All other managers have confirmed that they do not hold any of these securities.

Global Long-Only Equity

Despite a weaker September, resulting in part from concerns around news of continued spread of COVID-19, 3Q global equity returns were positive as a broad appetite for risk remained through most of the quarter. Supporting the generally risk-on environment was the continued, unprecedented policy support, both fiscal and monetary, worldwide. Market volatility remains elevated compared to pre-COVID levels, as the market seems to be focusing on any news related to a COVID vaccine and the US elections. Given the many unknowns and unclear path of economic growth and recovery, Growth stocks also continued to lead the Value peers that tend to be more cyclical. Looking out for the balance of the year, we expect COVID vaccine progress and the upcoming US general elections will undoubtedly take center stage for investors and increase volatility.

US Large Caps led in 3Q within the Domestic space with an advance of 8.9% besting Small Caps 4.9% return by 400 bps. On a **YTD basis, Large Caps** have been able to overcome the 1Q challenges and return to **positive** territory in part due to the outsized strength and size of Tech related companies. Small Caps have not been as fortunate, sitting at the worst decline this year worldwide at -8.7% on the heels of significant pressure in 1Q.

International Markets advanced on **gains in both Emerging and Developed Markets**. Emerging Market equities (MSCI EM Index) posted a healthy 9.70% return, followed by International Developed equities (MSCI EAFE index), which posted a more modest 4.88% return. Currency translation boosted US Dollar-denominated returns in both regions but was more pronounced for the EM index.

Global Equities Continued Higher in 3Q Following the 2Q Rapid Rise

Sources: Bloomberg, ACG Research

Global Long/Short Equity

Number of Days with Greater Than +/- 3% Moves in the S&P

Sources: Bloomberg, ACG Research

Volatility in the market (measured by the VIX) returned to **near the 20-year historical average** in 3Q, and MSCI ACWI **global equity** performance is **just above zero** for the year. This current status, however, **does not reflect the day-to-day market turbulence** in the year so far, as noted in the chart on the left. We anticipate this **higher volatility to continue to be the norm** for the foreseeable future as the election draws closer and uncertainty continues to dominate in many areas. All else being equal, an increase in market **volatility helps generate opportunities** on both the long and short side so equity long/short managers stand to benefit.

Equity long/short managers generally **had a good quarter**, supported by strong downside protection in September. Despite the market volatility both gross and net **exposure remain higher** than the historical average. Typically in the quarter prior to the presidential election short exposure to indices increases as managers attempt to retain flexibility/liquidity if they need to reposition quickly.

Style exposure remains a major contributor to performance as managers continue to be **overweight to momentum/growth**, especially **Technology** (which is at its highest level in the past ten years).

Global positioning continues to be **tilted toward the US** but **Asia exposure remains elevated** relative to the historical average as managers search for new growth opportunities.

Global Private Equity

The pandemic-driven freeze in new private equity transaction activity in the second quarter began to thaw over the summer. Although **private equity deal value through 3Q is down about 20% versus last year's total, momentum is clearly building behind the rebound and transaction activity appears to be poised for a very active fourth quarter.** This dynamic breaks with typical election year patterns where private equity deal activity often slows toward year-end as sponsors take a wait and see approach.

The US IPO market is in full boom mode as the third quarter racked up 81 IPOs and \$28.5 billion of proceeds, the **busiest third quarter since the Dot-com era.** The market remains wide open for healthcare, technology and consumer companies. Moving into the fourth quarter the outlook remains good as **numerous notable private companies are lined up to debut** including Airbnb, DoorDash and others who have confidentially filed. In fact the **IPO window is so open that alternative listing methods including SPACs and direct listings are experiencing a surge in investor interest.**

Full year fundraising appears as if it will fall short of 2019's record pace but the V-shaped recovery of US equity markets will both comfort private equity investors and drive the need for continued new commitments to keep pace with their now recovered portfolio values. Like their public company counterparts, **performance for most private equity funds made a strong recovery in 2Q** which is poised to continue as 3Q returns benefit from better comps and a more stable economic outlook.

US IPO Market

Global Real Assets

NCREIF Income Return Spread to Treasuries

Sources: NCREIF, ACG Research

In the second quarter the **NCREIF Property Index posted its first negative return in over a decade** as the income return of 1.01% was not enough to overcome negative appreciation of 2.00%. **The index ended the quarter down -0.99%. Returns were negative for all property types except industrial** which delivered a modest 1.02% gain. Rent collections suffered across all property types. Apartment, industrial and office assets fared best with modest declines of 1% - 4%. However, rent collections for retail assets fell over 12% and over 48% for hotels. **The drop in rent collections drove a decrease in the NCREIF annualized income return (a proxy for cap rates) from 4.40% in 1Q to 4.04% in 2Q.**

Transaction activity stalled as only 30 properties (out of 8,652) in the index were bought or sold in the quarter. In most quarters well over 100 properties typically transact. Without normal activity, appraisers are finding it difficult to pinpoint values and depreciation risk will continue until the market reopens more fully.

The **FTSE NAREIT US REIT index continued its rebound** with a +1.5% return in the third quarter, but **still remains one of the worst performing equity sectors with a negative -13.8% YTD return.**

The Bloomberg Commodity Index (BCOM) rose 9.1% in 3Q, outperforming the BloomBar US Aggregate Bond Index by 8.5% and the MSCI ACWI by 0.8% while underperforming the S&P 500 by 0.1%. Nymex oil rose 2.4% in 3Q but still remains down -34.1% for the year. **Gold continued its run with a +4.8% gain in the quarter and an impressive 23.9% gain for the year.**

Global Traditional Bond Markets

During the quarter, the **Fed formally announced its plan to transition to average inflation targeting** as part of its long-term policy framework. With this change, investors solidified expectations that **low rates will continue well into the future**, with the Fed’s own expectations showing the Fed Funds rate remaining at the current target range of 0 – 0.25% through 2023. Yield on the 10-year US Treasury gained 3 basis points across the quarter, while 2 and 5-year rates fell slightly resulting in a slightly steeper slope on the 2-10 portion of the yield curve.

The Q2 rebound in credit assets continued into the first part of Q3, though overall tightening across the quarter proceeded at a more moderate pace than in Q2, particularly after weakness in September saw credit positions give back some of their gains from the first part of the quarter. The **BloomBar US Aggregate** rose 0.6% across the quarter while the index’s yield-to-worst declined by about 7 basis points to 1.18% by the end of the quarter. Lower quality credit generated larger gains, as the **BloomBar US High Yield** index rose 4.6% for the quarter, despite the weakness in September. High yield spreads tightened from 626 to 477 basis points at the end of August, before widening back out in September to close the quarter at 517 basis points. Spreads remain above the pre-crisis low.

Municipal/treasury yield ratios saw further compression during the quarter but remain above long-term averages. The **BloomBar Municipal Bond** index gained 1.2% in Q3. **Unhedged Global** government bonds generated strong gains in Q3. **Emerging Market** bonds generated further gains and in some cases have recovered their Q1 losses.

Global Nontraditional Fixed Income

Percentile Rankings of Observations for Past 15-Years

Sources: Bloomberg, ACG Research

Unconstrained fixed-income strategies continued the positive recovery momentum in the third quarter. Most managers outperformed the Bloombar US Aggregate index during the quarter. The average return for the group was similar to the BloomBar Multiverse index (+2.6% for our unconstrained manager group vs +2.7% for the Multiverse index). Most managers in the category are now in positive territory on a year-to-date basis. Given an expectation for low interest rates to continue for some time, the **low duration exposure in this category may move from being a hindrance to a benefit**. Market volatility could create **additional opportunities** as investors assess the impact of elections, Covid, and potential US fiscal policy support. We continue to believe that diversification of risk factors within portfolios remains valuable, as this aids in downside protection and reduces key correlations.

Long/Short Credit strategies continued their rebound in the third quarter and several funds have returned to profitability on a YTD basis. While the recovery in securitized credit was slow to get started after the March drawdown, managers in the space saw gains continue into the third quarter, largely avoiding the volatility experienced by other spread-sensitive sectors in September. As spreads have tightened, **managers have grown increasingly choosy about the positions they decide to keep in portfolios**. Current sentiment favors maintaining liquidity and flexibility as investors look toward upcoming potential opportunities around market volatility and longer-term opportunities in distressed credit.

Although the third quarter brought a rebound in activity to the institutional loan market, the amount of new issue leveraged loans remained below normal levels due to a stalled M&A market. However, **improving market sentiment drove a pricing rebound. The average spread for a B+/B rated new loan tightened to L+388** by quarter end, well inside the L+600 levels seen in April.
