
Florida Municipal Pension Trust Fund – DB 70% Equity Allocation

Executive Summary

As of June 30, 2025

DB 70% Equity Allocation

- The US Fed held its benchmark rate steady at a range of 4.25% - 4.50%, but a few Fed officials have started to express support for a cut as long as inflation shows minimal response from tariff pressures. The deadline for the 90-day tariff pause looms in July, and while markets seem to have grown accustomed to higher tariffs, a widespread return to “Liberation Day” levels would be an unwelcome development. US equities rebounded in the second quarter as the S&P 500 reached a new all-time high. Non-US equity markets continued their YTD outperformance as a weaker dollar provided a tailwind. Core real estate returns maintained momentum with a 4th consecutive quarter of positive returns. However, the return is comprised almost entirely of income as price appreciation remains flat. The 70% Equity Allocation slightly trailed the Target Index in the second quarter, up 7.0% versus up 7.8%.
- This allocation has earned an 9.6% return over the past 5 years, ahead of the Target Index (up 9.5%).
- Over the past 10 years, this allocation is up 8.0% on average annually. While this performance is modestly behind the index, it ranks in the top 23rd percentile of the peer group, with the risk controlled nature of many of the underlying strategies providing downside protection should the markets continue to moderate or decline.

FMLvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund outpaced the Bloomberg US Aggregate A+ Index in the second quarter (up 1.4% vs up 1.1%), and ranked in the top 31st percentile of its peer group of US core fixed income managers. The Fund has continued to benefit from its exposure to the ABS sector and security selection within the MBS sector. Over the past 3 years, the Fund has achieved over 40 basis points of excess return on average annually relative to the benchmark.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMLvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund trailed the Bloomberg Multiverse in the second quarter, up 2.8% vs. up 4.6%, as the underweight to non-US markets slowed performance. The fund benefited from an overweight to the belly of the yield curve, notably the 5-year portion. Strong security selection within the Financials and industrial sectors continues to move the Fund forward. The fund has outpaced the benchmark by nearly 100 basis points over the past year and ranks in the top 32nd percentile of its peer group of global unconstrained fixed income managers.
- In the 10 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 2.5% on average annually, ahead of the benchmark (up 1.4%).

FMLvT Diversified Large Cap Equity Portfolio

- The fund is allocated 60% to the SSgA S&P 500 Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity marketplace. The SSgA S&P 500 Fund replaced Intech in the fourth quarter 2023.
- U.S. equities bounced back from the first quarter struggles with the S&P 500 reaching a new all-time high as investors became increasingly optimistic for trade deals. The underweight to the information technology and consumer discretionary sectors, and thus, being underweight to the Magnificent 7, continues to be a headwind as the Diversified Large Cap Equity Portfolio trailed the Russell 1000, up 8.3% vs. up 11.1%.
- The Diversified Large Cap Equity portfolio has achieved a 15.5% return on average annually over the past 5 years.

Florida Municipal Pension Trust Fund – DB 70% Equity Allocation
Executive Summary
As of June 30, 2025

FMIvT Diversified Small to Mid Cap Equity Fund

- The Diversified Small to Mid Cap Equity Fund trailed the benchmark in the second quarter, up 3.6% vs. up 8.6%, as lower quality factors like high beta, high valuation, and companies with negative earnings outperformed. While markets have become more optimistic, economic factors like growing budget deficits, unsettled tariff policy and persistent inflation remain real concerns. Despite the difficulties facing the asset class, the Fund outpaced the benchmark by 160 basis points over the past 5 years.
- This strategy has generated very strong results over the past 10 years, rising 11.9% on average annually compared with 8.4% for the benchmark. Furthermore, the fund ranked in the top 12th percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMIvT International Equity Portfolio

- The FMIvT International Equity Portfolio's momentum continued in the second quarter with the fund rising 15.6% vs. up 12.0% for the MSCI ACWI ex US – Net benchmark, and ranking in the top 19th percentile of its peer group universe. Non-US equity markets outperformed their US counterparts as a weaker dollar provided a tailwind. Stock picking in industrials and IT, as well as in Germany and Switzerland, drove performance the most in the quarter. The fund has outpaced the benchmark by over 330 basis points over the past year (up 21.1% vs. up 17.7%). The portfolio has outperformed the benchmark over all longer term time periods.
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMIvT Core Real Estate Portfolio

- In early 2023, a \$50 million redemption was submitted in order to rebalance the portfolio with the proceeds scheduled to be paid out over several quarters. This will reduce the total commitment to \$100 million once all the proceeds are received.
- Core real estate returns maintained momentum with a fourth consecutive quarter of positive returns. However, the return is comprised almost entirely of income as price appreciation remains flat. While rising 3.4% over the trailing one year, the FMIvT Core Real Estate portfolio significantly outperformed the benchmark (up 2.7%). Commercial real estate seems to have stabilized overall even as office vacancy rates remain elevated. A resumption of Fed rate cutting could act as a catalyst for transaction volume and price appreciation.
- The portfolio has outperformed the NFI ODCE Net benchmark over the past 5 years and has achieved nearly 300 basis points of excess return over the benchmark over the past 7 years.
