
Florida Municipal Pension Trust Fund – DB 60% Equity Allocation
Executive Summary
As of December 31, 2025

DB 60% Equity Allocation

- The FOMC approved a 3rd rate cut of 2025 in December, lowering the Federal Funds rate target range to 3.50% - 3.75%, with the committee's updated dot plot forecasting just one additional cut in 2026. Consumer prices rose at a 2.7% yearly rate last month, a decline from September's 3.0% rate. The rate was well below expectations, however the government shutdown limited data collection, potentially impacting the reliability of the results. Optimism around the AI theme continues to support equity markets. US technology giants have largely been the beneficiaries, but performance has broadened across a wider range of companies, sectors, and regions. Emerging markets continue to be the top performer, supported by strong returns from Chinese equities. Core real estate returns maintained momentum with a 5th consecutive quarter of positive returns. The 60% Equity Allocation trailed the Target Index in the fourth quarter, up 1.2% versus up 2.4%.
- This allocation has earned a 12.1% return over the past year and risen 10.5% over the past 3 years.
- Over the past 10 years, this allocation is up 7.8% on average annually. While this performance is slightly behind the target index (up 8.3%) the risk-controlled nature of many of the underlying strategies are designed to provide downside protection should the markets continue to moderate or decline.

FMLvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund outperformed the Bloomberg US Aggregate A+ Index in the fourth quarter (up 1.2% vs up 1.1%). The Fund's yield curve positioning and ABS holdings added to the returns with the portfolio well positioned going forward, especially with the tight spreads in lower quality corporates. Over the past 10 years, the Fund has matched the performance of the benchmark (both up 1.7%).
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMLvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund outpaced the Bloomberg Multiverse in the fourth quarter, up 1.3% vs. up 0.4%. Strong security selection within the financials sector continues to move the Fund forward. Exposure to insurance-linked assets also contributed to the performance amid elevated premiums and insured losses that were lower than expected in the 2025 hurricane season. The fund has outpaced the benchmark by over 170 basis points in 2025 and ranks in the top 38th percentile of its peer group of global unconstrained fixed income managers.
- In the 10 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 2.7% on average annually, ahead of the benchmark (up 1.5%).

FMLvT Diversified Large Cap Equity Portfolio

- At the end of third quarter 2025 the decision was made to transition the Fund's allocation to 100% to the SSgA S&P 500 Fund. The assets from the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund were transferred to a transition account at Northern Trust at the end of September and were fully invested in the SSgA S&P 500 Fund on 10/1/2025. This fund provides investors with passive exposure to the US large cap equity marketplace.
- U.S. large cap equities continue to show resiliency through this tumultuous market environment, with the S&P 500 finishing 2025 near a record high and marking the third year in a row of double digit returns for the index. The Fund matched the performance of the S&P 500 in the fourth quarter, both rising 2.6%.
- The Diversified Large Cap Equity portfolio has achieved a 15.4% return on average annually over the past 7 years.

Florida Municipal Pension Trust Fund – DB 60% Equity Allocation
Executive Summary
As of December 31, 2025

FMIvT Diversified Small to Mid Cap Equity Fund

- The Diversified Small to Mid Cap Equity Fund trailed the benchmark in the fourth quarter, down 0.5% vs. up 2.2%, as lower quality factors like high beta, smaller size, and companies with negative earnings outperformed. While markets continue to become more optimistic, economic factors like growing budget deficits, unsettled tariff policy and persistent inflation remain real concerns. Despite the near-term difficulties for the Fund, it has risen 11.0% over the past 7 years.
- This strategy has generated very strong results over the past 10 years, rising 10.7% on average annually compared with 10.4% for the benchmark. Furthermore, the fund ranked in the top 40th percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMIvT International Equity Portfolio

- The FMIvT International Equity Portfolio's momentum continued on an absolute basis in the fourth quarter with the fund rising 1.3%. This trails the MSCI ACWI ex-US Net benchmark (up 5.1%) with challenging stock selection in the consumer discretionary and communication services sectors hindering the relative performance. However, the market outlook remains positive on the global economy with a recalibration of US trade policy and a shift in global monetary stances tempering fears of a sharp slowdown. Despite the near-term underperformance, the Portfolio has risen 30.7% over the past year, and has outperformed the benchmark over the last 7 years.
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMIvT Core Real Estate Portfolio

- In early 2023, a \$50 million redemption was submitted in order to rebalance the portfolio with the proceeds scheduled to be paid out over several quarters. FMIvT received the final proceeds of their redemption request in December, and the total commitment has been reduced to \$100 million.
- Core real estate returns maintained momentum with a fifth consecutive quarter of positive returns. However, the return is comprised almost entirely of income as price appreciation remains flat. While falling 1.6% over the past 3 years, the FMIvT Core Real Estate portfolio significantly outperformed the benchmark (down 4.3%). Commercial real estate seems to have stabilized overall even as office vacancy rates remain elevated. A resumption of Fed rate cutting could act as a catalyst for transaction volume and price appreciation.
- The portfolio has outperformed the NFI ODCE Net benchmark over the past 5 years and has achieved nearly 160 basis points of excess return on average annually over the benchmark over the past 7 years.
