
Florida Municipal Pension Trust Fund – DB 50% Equity Allocation
Executive Summary
As of March 31, 2026

DB 50% Equity Allocation

- The FOMC held rates steady in March, with forward guidance continuing to project one additional 25 basis point cut in 2026, though market expectations shifted dramatically from two cuts to zero as energy-driven inflation fears took hold. The Iran War was the key focus for investors, driving increased volatility and a sharp 38 basis point rise in the 10-year Treasury yield. Broad equity indices fell in March as markets assessed the impact of higher oil prices on consumer demand and corporate margins, while the US dollar strengthened as a safe-haven. Core real estate earned a modestly positive return for a sixth consecutive quarter, with all property sectors positive and the office sector appearing to have passed through its trough. The 50% Equity Allocation trailed the Target Index in the first quarter, down 1.1% versus down 0.7%.
- Despite the lower allocation to equity, the 50% Equity Allocation has managed to earn an 8.7% return over the past year and risen 8.2% over the past 3 years.
- Over the past 10 years, this allocation is up 6.7% on average annually. While this performance is modestly behind objectives, the risk controlled nature of many of the underlying strategies are designed to provide downside protection should the markets continue to moderate or decline.

FMIvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund matched the Bloomberg US Aggregate A+ Index in the first quarter. The Fund's yield curve positioning and ABS holdings added to the returns with the portfolio well positioned going forward, especially with the higher valuations in lower quality corporates. Over the past 10 years, the Fund has achieved over 30 basis points of excess return on average annually relative to the benchmark.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMIvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund outpaced the Bloomberg Multiverse in the first quarter, up 0.1% vs. down 1.1%. Exposure to collateralized mortgage obligations helped drive modest gains in January and February, while remaining stable during the March volatility. Insurance-linked assets also contributed to the performance, while exposure to sovereign bonds, and an overweight in financials detracted. The fund has outpaced the benchmark by nearly 280 basis points over the past year and ranks in the top 34th percentile of its peer group of global unconstrained fixed income managers.
- In the 10 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 3.1% on average annually, ahead of the benchmark (up 0.8%).

FMIvT Diversified Large Cap Equity Portfolio

- At the end of third quarter 2025 the decision was made to transition the Fund's allocation to 100% to the SSgA S&P 500 Fund. The assets from the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund were transferred to a transition account at Northern Trust at the end of September and were fully invested in the SSgA S&P 500 Fund on 10/1/2025. This fund provides investors with passive exposure to the US large cap equity marketplace.
- Broad equity indices fell in March as investors assessed the potential impact of higher oil prices on consumer demand and corporate profit margins. Despite the downturn equity valuations remain above average overall, particularly for US large caps, but growth expectations are supportive for now. The Fund matched the performance of the S&P 500 in the first quarter, both falling 4.3%.
- The Diversified Large Cap Equity portfolio has achieved a 12.9% return on average annually over the past 7 years.

Florida Municipal Pension Trust Fund – DB 50% Equity Allocation
Executive Summary
As of March 31, 2026

FMIvT Diversified Small to Mid Cap Equity Fund

- The Diversified Small to Mid Cap Equity Fund trailed the benchmark in the first quarter, down 4.2% vs. up 2.0%, as lower quality factors like high beta, smaller size, and companies with negative earnings outperformed. The portfolio's lack of energy exposure detracted as that sector was up significantly on concerns in the Middle East. Despite the near-term difficulties for the Fund, it has risen 8.6% on average annually over the last 7 years.
- This strategy has generated very strong results over the past 10 years, rising 10.6% on average annually, matching the benchmark.

FMIvT International Equity Portfolio

- The FMIvT International Equity Portfolio outpaced the MSCI ACWI ex-US Net benchmark in the first quarter, down 0.1% vs. down 0.7%), with the escalation of the conflict in Iran erasing the positive performance generated in the first two months of the quarter. Stock selection in the information technology and energy sectors were contributors, with an underweight to communication services and materials detracting. Despite the headwinds, the Portfolio has risen 23.8% over the past year, and has outperformed the benchmark over longer term time periods.
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMIvT Core Real Estate Portfolio

- In early 2023, a \$50 million redemption was submitted in order to rebalance the portfolio with the proceeds scheduled to be paid out over several quarters. FMIvT received the final proceeds of their redemption request in December, and the total commitment has been reduced to \$100 million.
- Core real estate returns maintained momentum with a sixth consecutive quarter of positive returns. However, the return is comprised almost entirely of income as price appreciation remains flat. Property transaction volume has improved, and the office sector appears to have passed through its trough. Economic uncertainty could impact dealmaking, but additional rate cutting in 2026 would be a positive for the real estate sector. The FMIvT Core Real Estate portfolio (down 0.9%) outperformed the benchmark (down 2.8%) over the past 3 years.
- The portfolio has outperformed the NFI ODCE Net benchmark over the past 5 years and has achieved nearly 150 basis points of excess return on average annually over the benchmark over the past 7 years.
