Florida Municipal Pension Trust Fund – DB 50% Equity Allocation
Executive Summary
As of June 30, 2026

DB 50% Equity Allocation

- Investors welcomed progress towards fully reopening the Strait of Hormuz with the signing of the U.S.-Iran memorandum of understanding in June. Oil prices returned to near pre-war levels following the de-escalation, and forward inflation expectations declined. In Kevin Warsh's first meeting as chair on June 17th, the Fed held rates steady at 3.50% - 3.75% in a unanimous vote and pared back its statement to remove the prior bias toward cuts. Equities turned choppier in June as a rotation out of crowded AI and technology leaders pressured the major indices, but equities overall wrapped up an exceptional first half of 2026. The US Treasury yield curve flattened in June, and credit spreads widened amid high issuance but remain near historical tights. Core real estate returns stayed consistent in early 2026, with returns continuing to be primarily income-based as appreciation remains flat. The 50% Equity Allocation trailed the Target Index in the second quarter, up 6.0% versus up 8.3%.
- Despite the lower allocation to equity, the 50% Equity Allocation has managed to earn an 8.9% return over the past year and risen 9.9% over the past 3 years.
- Over the past 10 years, this allocation is up 7.2% on average annually. While this performance is modestly behind objectives, the risk controlled nature of many of the underlying strategies are designed to provide downside protection should the markets continue to moderate or decline.

FMIvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund slightly trailed the Bloomberg US Aggregate A+ Index in the second quarter, up 0.4% vs. up 0.5%. The Fund's high quality bias and lack of exposure to the lower quality corporates dragged on the performance in the quarter. Over the past 10 years, the Fund has achieved over 30 basis points of excess return on average annually relative to the benchmark.
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMIvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund outpaced the Bloomberg Multiverse in the second quarter, up 1.6% vs. up 1.0%. Relative overweights to industrials and financials were the primary contributors. Security selection within industrials as well as a structural underweight to treasuries proved to be additive in a quarter where spread sectors broadly outperformed. The fund has outpaced the benchmark by over 500 basis points over the past year and ranks in the top 38th percentile of its peer group of global unconstrained fixed income managers.
- In the10 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 3.1% on average annually, ahead of the benchmark (up 0.6%).

FMIvT Diversified Large Cap Equity Portfolio

- At the end of third quarter 2025 the decision was made to transition the Fund's allocation to 100% to the SSgA S&P 500 Fund. The assets from the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund were transferred to a transition account at Northern Trust at the end of September and were fully invested in the SSgA S&P 500 Fund on 10/1/2025. This fund provides investors with passive exposure to the US large cap equity marketplace.
- US large cap equities rebounded from the first quarter headwinds, with the strategy matching the performance of the S&P 500 in the second quarter, both rising 15.2%. AI momentum continued to push them to new highs despite geopolitical turmoil. Earnings estimates have trended higher, with the S&P 500's second quarter earnings growth rate currently estimated at 23.1%, up from 18.8% on March 31st, though the growth is concentrated in the energy and information technology sectors.
- The Diversified Large Cap Equity portfolio has achieved a 14.4% return on average annually over the past 7 years.

Florida Municipal Pension Trust Fund – DB 50% Equity Allocation

Executive Summary

As of June 30, 2026

FMIvT Diversified Small to Mid Cap Equity Fund

- The Diversified Small to Mid Cap Equity Fund trailed the benchmark in the second quarter, up 5.1% vs. up 20.6%, as lower quality factors like high beta, smaller size, and companies with negative earnings outperformed. The portfolio's lack of AI-related technology holdings and AI-adjacent industrial stocks accounted for a large portion of the underperformance. Despite the near-term difficulties for the Fund, it has risen 8.1% on average annually over the last 7 years.
- This strategy has generated very strong results over the past 10 years, rising 10.7% on average annually.

FMIvT International Equity Portfolio

- The FMIvT International Equity Portfolio modestly trailed the MSCI ACWI ex-US Net benchmark in the second quarter, up 12.6% vs. up 14.5%). Stock selection in the information technology sector was the biggest detractor, with the funds underweight position to SK Hynix as the company crossed the $1T market capitalization threshold being the main drag on performance. Despite the headwinds, the Portfolio has risen 20.6% over the past year, and has outperformed the benchmark over the last 10 years.
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMIvT Core Real Estate Portfolio

- A $50 million contribution was made to the portfolio in the first quarter of 2026, and the total commitment has been increased to $150 million.
- Core real estate returns stayed consistent in early 2026, with returns continuing to be primarily income-based as appreciation remains flat. The office sector's stabilization from its trough continued as it performed in-line with the broader index. The elimination of near-term rate cut expectations represents a headwind for the sector, as higher-for-longer financing costs weigh on valuations. The FMIVT Core Real Estate portfolio (up 3.7%) outperformed the benchmark (up 3.6%) over the past year.
- The portfolio has outperformed the NFI ODCE Net benchmark over the past 5 years and has achieved over 250 basis points of excess return on average annually over the benchmark over the past 7 years.
